

Instructions for Use

Instructions below are for reference only. Please follow the instructions that came with your product.

To maintain a healthy colony, sugar syrup activated with HiveAlive™ should be fed annually for increasingly stronger colonies.

Instructions for Activated Syrup

1. Contents will settle: **Shake well**
2. Add HiveAlive™ to sugar syrup using the following table as a guide, the temperature of the syrup must not be above 50°C/122°F. We recommend 2 gallons of activated syrup per hive:

Sugar Syrup	Amount of HiveAlive™ to be added:	
2 Gallon (US)	20 ml	4 teaspoons
2 Gallon (UK)	24 ml	5 teaspoons
8 Litres	22 ml	4.5 teaspoons

3. Stir well.

Instructions for Feeding

- HiveAlive should be fed at the end of the honey harvest when the honey supers have been removed.
- An additional feed of activated syrup in the spring before the honey flow is beneficial.
- For optimum results, all syrup fed after the honey harvest should be activated with HiveAlive™.
- We recommend feeding a minimum of 8 litres (2 US gallons) of activated syrup per hive.

If bees are too weak to feed directly from feeders, spray/drench with HiveAlive™ activated syrup before feeding as above:

Instructions for Spraying/Drenching

Spray/drench 3 times, with ideally 4 days intervals between each application.

For optimum results, make up syrup with equal parts sugar and water (1:1) and then activate with HiveAlive™.

- Spray a minimum of 350 ml (12 US fl. oz) in the entire brood box, wetting bees and both sides of all frames.

Alternatively, you can drench the hive by sprinkling the activated syrup evenly between the frames.

- After third and final spray follow "Instructions for Feeding" as above.

There should be no need to spray/drench again provided you feed bees as recommended with HiveAlive™ each year.

Hives can be sprayed/drenched up to 2 weeks, or be fed up to 4 weeks, before adding honey supers.

We recommend feeding a minimum of 2 gallons per hive

One 100 ml bottle can be added to 38 litres (10 US gallons, 8 UK gallons) of syrup

One 500 ml bottle can be added to 190 litres (50 US gallons, 42 UK gallons) of syrup

Active Ingredients: Marine Bio-Extracts, Thymol, Lemongrass oil, (No artificial ingredients)

Colour variation is normal for this product

This is a natural product but please note the following:

Keep out of reach of children

Avoid contact with skin

In case of skin contact, wash with plenty of water

In case of eye contact rinse with water for at least 15 minutes

If large quantities of this material are swallowed drink large amounts of water and call a physician
