

- **Stimulatory feed exclusively for honeybees**
- **Promotes controlled population growth, corrects nutritional deficiencies and expands bee lifespan**
- **Boosts brood rearing, leading to stronger colonies and increased honey production**
- **Safe and effective for use during honeyflow**

USAGE:

VitaFeed Nutri is a nutritional supplement scientifically formulated to enhance honeybee diets. In early spring, use VitaFeed Nutri to support colony development when there is a lack of pollen. In late spring, use VitaFeed Nutri to stimulate increased egg laying and boost colony growth. VitaFeed Nutri can also be used during a summer pollen gap and in autumn to increase winter survival rates.

For Colonies:

IN SPRING: Dissolve 5-10 grams of VitaFeed Nutri in 1 litre of sugar syrup 2:1 (2 parts sugar to 1 part water) or high fructose corn syrup and apply in the hive feeder. Repeat 3 times, with an interval of 7-10 days between each application.

DURING HONEYFLOW: Sprinkle 10 grams of VitaFeed Nutri powder on top of the brood frames when installing, adding and removing honey supers (3 applications).

For Nuclei and Packages:

Dissolve 5 grams of VitaFeed Nutri in 0.5 litres of sugar syrup 2:1 (2 parts sugar to 1 part water) or high fructose corn syrup and apply in the hive feeder. Repeat 3 times, with an interval of 7-10 days between each application.

SCIENTIFICALLY FORMULATED AND EXTENSIVELY TESTED MIXTURE OF VITAMINS AND AMINO ACIDS SPECIFICALLY DEVELOPED TO BOOST YOUR BEES.
