API-BIOXAL

Veterinary medicine based on oxalic acid

Bag 35g for 10 beehives*

Bag 175g for 50 beehives*

Bag 350g for 100 beehives*

*Considering 10 frames full of bees (administration by trickling)

ADVANTAGES

- Guarantee for consumer, bees and beehives products
- Each package to treat an exact number of beehives
- Allowed in organic beekeeping
- Powder easily soluble in sugar solution at room temperature
- High effectiveness and tolerability

DOUBLE WAY OF ADMINISTRATION

by Trickling

Dissolve all the powder of the bag in the sugar syrup prepared as follow:

BAG	SYRUP	SUGAR	WATER
35 g	500 ml	308,6 g	308,6 ml
175 g	2500 ml	1543,2 g	1543,2 ml
350 g	5000 ml	3086,4 g	3086,4 ml

Dosage: 5 ml of the solution for frame full of bees, in a single administration.

by Vaporisation

Use an electrical vaporizer following the manufacturer's directions

Dosage: 2,3g for beehive

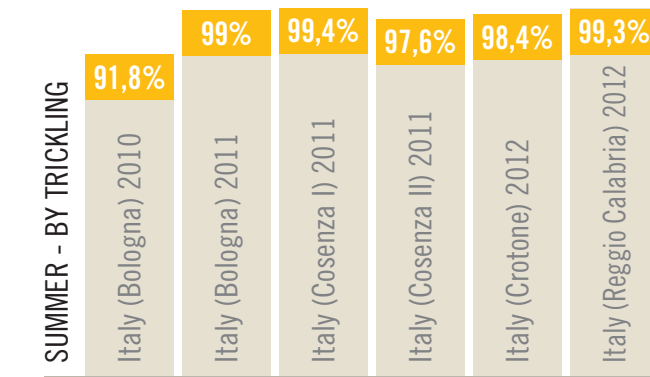

ADVISE FOR USE

- For summer treatment stop the queen laying artificially for 25 days, then do the treatment
- All colonies in the same apiary should be treated simultaneously to avoid reinfestations
- When handling powder product (both during vaporisation phase and pre-treatment phases) wear protective mask type FFP2, gloves and protective glasses.

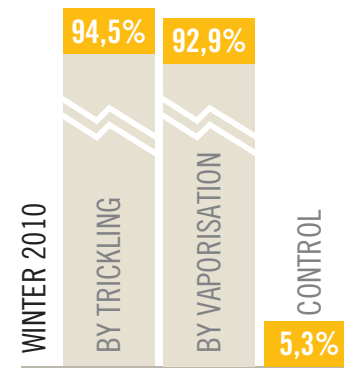

(For further instructions and advice of use see the product label)
