Professional beekeepers, manufacturers and retailers | est.1953

NEW
products
for 2023

Catalogue of Beekeeping Equipment 2023

Maisemore Apiaries began when Leo and Leslie Hiam started keeping bees as a hobby, when the Second World War began they had to go and help the war effort so the bees were left to their own devices, on their return they increased the number of bees and began to make beekeeping equipment.

Now Maisemore Apiaries is still a family run and owned business, looked after by Eric, Johnathan, Caroline and Mark Hiam.

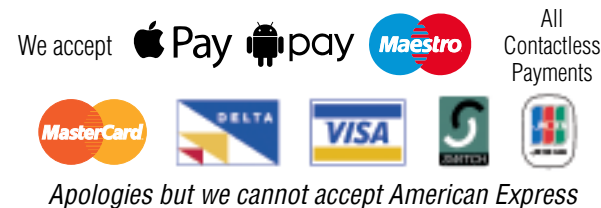

We are based in Maisemore, Gloucester and are still working from some of the same buildings that Leo and Leslie worked in, we now supply all of the UK and Ireland and indeed all the world.

Opening Hours

Monday - Friday 9am - 5pm
Saturday, Sunday & Bank Holidays CLOSED

We will be closed for Christmas 2023 from 22nd December 2023 to Tuesday 2nd January 2024.

Purchase your Beekeeping Supplies Securely at Bees-Online.co.uk. Most major credit cards taken, with Thawte® 128 bit Encryption, your personal details are **SAFE & SECURE**.

Welcome to Maisemore Apiaries Ltd

We no longer have a shop but offer a 'Click & Collect' service from our premises. Order online or by phone and we will contact you to arrange a suitable day and time for collection. Please note same day collection is not available.

The Environment

All the timber used in making our bee hives and hive parts come from sustainable forests around the world.

Wood waste is all recycled, saw dust and shavings are all bagged in our plant and used as bedding for pets and horses, timber off cuts are used as firewood. We also now manufacture wooden briquettes for open fires, ovens, chimeneas, woodburning stoves and bbqs at an amazing price of **£5 per 10kg** when collected from our premises.

Last year we bought a machine for recycling cardboard, old cardboard boxes are collected from local shops and used as loose fill/packaging for all mail orders.

We cater for everyone from the smallest hobbyist to the serious professional

S/S Metal Runners (per pair) (page 49)	-	£3.52

The National hive is the most widely used hive in the UK and is available in several options, you may decide you require a larger brood area than a standard brood chamber offers, you will then require a 14 x 12 brood chamber or possibly an open mesh floor instead of a solid floor, there is also the option of an 8" deep roof, hive stand or gabled roof to make your National hive to look more like a WBC.

All flat packed cedar hive parts come complete with assembly instructions.

The WBC hive is the one most children would draw when asked to draw a bee hive, there is an outer skin and inner skin which offers more protection from the elements but also makes it more time consuming to use, this hive can also be purchased with a 14 x 12 brood chamber or an open mesh floor.

All flat packed cedar hive parts come complete with assembly instructions.

WBC Hive

Assembly Instructions available to download from our website

Poly Hives, Nucs & Parts inc. VAT

ALL OUR POLYSTYRENES BEE HIVES AND HIVE PARTS ARE MADE HERE IN THE UK AND ARE OF 100G/LITRE AND ARE UP TO 3 TIMES STRONGER THAN POLYSTYRENE USED IN PACKAGING. WHEN PAINTED WITH SMOOTH MASONRY PAINT THESE POLYSTYRENE HIVES WILL LAST FOR 30+ YEARS.

Now in our 3rd generation of commercial bee farming and bee hive manufacturing Maisemore Apiaries have designed our own Polystyrene hive and hive parts made from a high density material which has good strength up to three times stronger than used for packaging.

They are lightweight, cheaper and durable and has excellent insulation properties to help keep the bees warm through winter.

Our polystyrene Brood Chambers and Supers have dovetail joints for easy assembling and do not require runners as they are built into the mould.

They come supplied flat packed with screws for assembling or ready assembled and if you want to glue them we recommend Copydex. They come shrinkwrapped and can be bought individually or as a complete hive.

They are compatible with all our wooden National hive parts, frames & accessories but you cannot use a wooden roof with the polystyrene.

They can be painted (outside only) with a masonry paint or just left as they are.

- Q. National/Commercial Poly Hive Rhombus Clearer Board**
A rhombus clearer board for Maisemore Poly Hives - this is our preferred method of clearing our bees, a simple 6mm plywood board in a wooden frame with a large hole drilled centrally and fixed with a rhombus escape, there are no moving parts so there is nothing to be clogged by the bees. £24.26

Assembly Instructions

Pic 1.
You can see the rounded edges at the top with the hand holes pointing out and down to disperse water.

Pic 2.
You can see the Poly frame runner which gives you space to pick up the frame and should be opposite each other when assembling.

Pic 3.
Behind the frame runner is a slot which will accept castellated frame spacers if required.

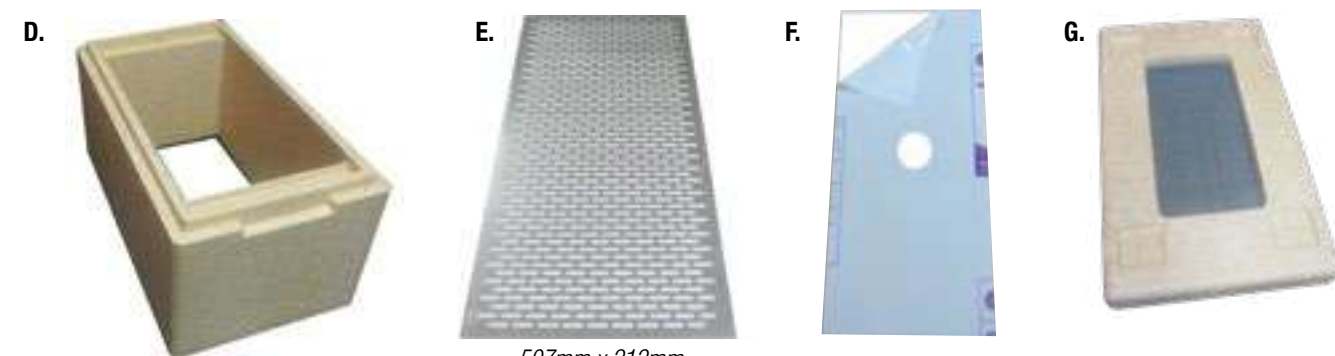

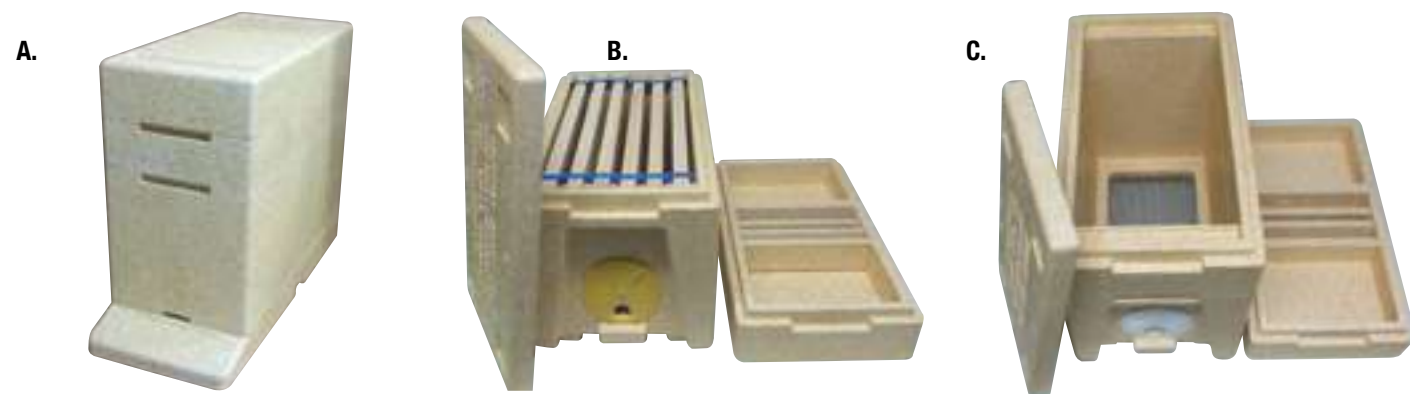

Caring for your Hive/ Nucleus

Painting If you want to paint your polystyrene hive, this will help prolong its life expectancy, but only paint the outside. We advise using smooth exterior masonry paint, we sell Santex Ultra Masonry paint in two colours, Sand Dune or Brick Red, but this can be bought from any DIY hardware store. When looked after, your polystyrene hive will last 20 years+.

Cleaning For cleaning your polystyrene hive, we use and sell soda crystals, which is totally bio-degradable and ideal for removing propolis and wax. Soda crystals are also great on hive tools, smokers, gloves and bee suits, but please take care and wear suitable gloves and clothing when using any cleaning product.

You must clean your hive of propolis and wax before steralisation. For steralisation, use a gentle bleach containing hypochlorite, which is required for steralisation against AFB.

Plastic Frames inc. VAT

NEW

Nat Plastic Hoffman Frames

- Food-grade plastic
- 5.3 mm cell size
- Will not ROT
- Impervious to wax moth
- One piece design requires no assembly
- Will stand up to season after season, extraction after extraction
- Our plastic is brand new and 100% recyclable

For faster results it is advised to paint both sides of the plastic foundation with liquid beeswax, it can be applied with a brush or a roller, also just by rubbing a block of wax over the comb will help, unwaxed frames will still be drawn by the bees but may take a little longer!

	Each
SN4	£3.54
DN4	£4.74

VEILS ARE NOT MACHINE WASHABLE PLEASE DETACH BEFORE WASHING. WASH VEILS BY HAND ONLY.

Clothing inc. VAT

Our protective clothing range is made from long lasting poly cotton, and is made to the highest standards for durability and comfort. All items are fully machine washable. All items are machine washable at 30°C but please remove the veil first and wash veil by hand only.

A. & B. are available to order from stock in the following:

- A. Round all in one Suit (White/Khaki/Sage)**
This item of protective clothing offers head to toe protection with elasticated cuffs and elasticated & zipped ankles for easy cover over your boots. The veil is fully detachable from the suit for machine washing. Also available in Khaki or Sage.

S, M, L, XL, XXL, XXXL	£110.00
------------------------	---------
- B. Hooded all in one Suit (White/Khaki/Sage)**
This item of protective clothing offers head to toe protection with elasticated cuffs and elasticated & zipped ankles for easy cover over your boots. The veil is fully detachable from the suit for machine washing. Also available in Khaki or Sage.

S, M, L, XL, XXL, XXXL	£110.00
------------------------	---------

- B. Childs Hooded all in one Suit (White Only)**
The child's hooded all-in-one has the same level of protection as all the adult sizes so should keep your child well protected when learning about bees.

Sizes:

Age 4	14-16" Chest Height up to 4'0"
Age 6,	18-20" Chest Height up to 4'2"
Age 8 - 3XS	22-24" Chest Height up to 4'5"
Age 10 - 2XS	26-28" Chest Height up to 4'8"
Age 12 - XS	30-32" Chest Height up to 5'1"

£80.80
- C. Beekeeping Overalls (White Only)**
Plenty of pockets to keep all your bits and bobs in, elasticated cuffs and elasticated & zipped ankles, completely bee tight, all you now require is a veil.

S, M, L, XL, XXL, XXXL	£49.02
------------------------	--------
- D. Ventilated Hooded all in one (White Only)**
This item of protective clothing offers head to toe protection with elasticated cuffs and elasticated zipped ankle, all YKK zips with waterproof knee patches, plenty of pockets and extra large hooded veil. (White only)

S, M, L, XL, XXL, XXXL	£119.07

Extraction inc. VAT

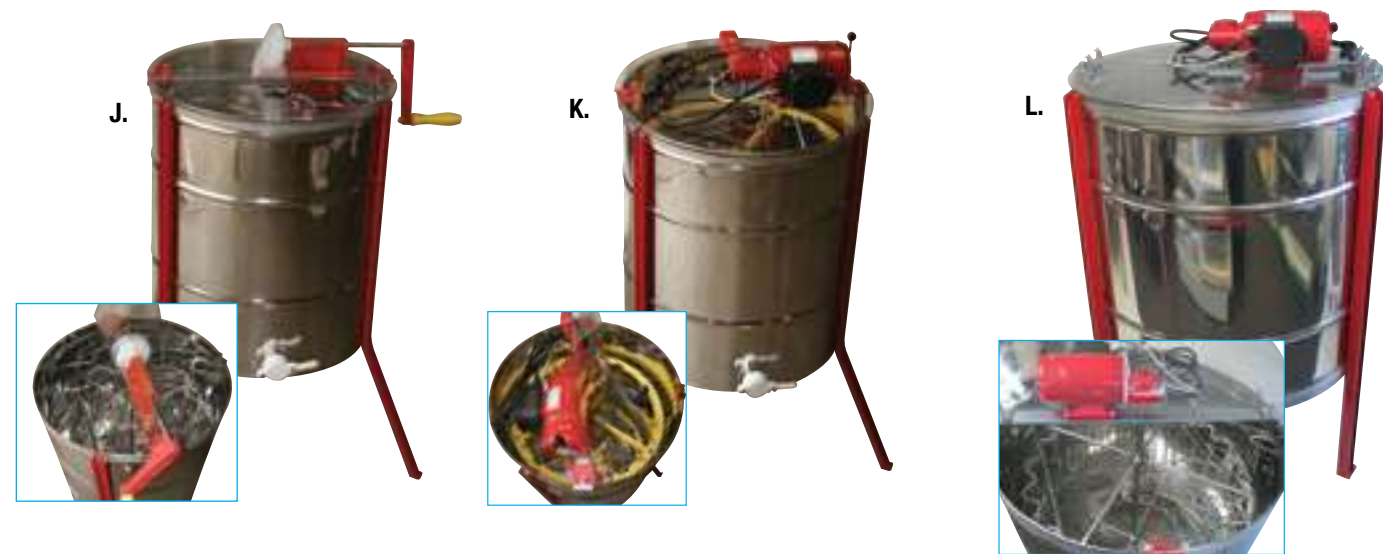

See our website for more information

- A. 3 Frame with Chrome Cage
takes 3 frames of all sizes and comes complete with legs, has nylon gears and nylon tap and comes with a chrome cage. All frames tangential. £359.72
- B. 4 frame with Stainless Steel Cage
this is the start of our extraction range, made completely of stainless steel so you do not have to worry about plastic barrels breaking and going brittle, sits on a table or a box, has a stainless steel cage, nylon cogs and nylon tap. Takes 4 shallow or 2 deep, all types of frames tangential. (Includes Lids) £259.18
- C. 4 frame with legs with Stainless Steel Cage
same as B. but with legs can be bolted to the floor or to a pallet to stop the annoying wobble when extracting. Takes 4 shallow or 2 deep, all frames tangential. (Includes Lids) £312.22
- D. 4 frame with filter & tank with Stainless Steel Cage
same as B. but comes with an integral filter and tank, the tank holds approx. 50kg of honey, so as you extract your honey drops through the holes in the bottom of the extractor, through the filter and into your tank ready for bucketing. Takes 4 shallow or 2 deep, all types of frames tangential. (Includes Lids) £391.41
- E. 6 frame RADIAL (electric) extractor with Stainless Steel Cage
6 frame s/s electric radial extractor - will take 6 x sn4 frames, 6 x sn1 frames or 6 x bs manley shallow frames, also takes 3 x bs deep frames tangentially, cage & drum are stainless steel, comes complete with nylon honey tap & 2 plastic hinged see-through lids, also has a lid lock for safety & the speed of the motor is variable. (Includes Lids) £864.81
- F. 9 frame (electric) Manley extractor with Stainless Steel Cage
9 frame extractor with 80 watt reversible motor, stainless steel drum and cage, red enamelled legs and nylon tap, will accept 9 Manley frames and all types of shallow frames, complete with clear perspex lid. £1187.99

COLLECTION ONLY

G. 6 frame RADIAL (manual) extractor with Stainless Steel Cage
6 frame radial extractor with legs, s/steel drum, s/steel cage, 2 clear plastic lids, will extract National and WBC shallow frames only to include Manley, SN4s, SN1s, SN2s and SN5s also takes 3 x bs deep frames tangentially. (Includes Lids) **£500.43**

H. 3 Frame Acrylic Extractor with Stainless Steel Cage (Inc Lids) COLLECTION ONLY
This extractor has a clear acrylic body which allows you to see the honey leaving the frames when being extracted, will take all frames except 14x12, Dadant deep, Commercial deep and Langstroth Jumbo. **£265.23**

I. 9 frame (manual) extractor with Resin Cage
9 frame radial extractor complete with tangential screens, able to take all types of shallow frames except Manley all types of deep frames can be extracted tangentially, has a stainless steel barrel and resin moulded cage, nylon tap, two piece see through lids and enamelled legs. **£479.75**

J. 9 frame (manual) Manley extractor with Stainless Steel Cage
9 frame radial extractor complete with tangential screens, will accept 9 shallow Manley frames and all types of shallow frames and can be extracted tangentially, has a stainless steel barrel and stainless steel cage, nylon tap, two piece see through lids and enamelled legs. (Includes Lids) **£639.22**

K. 9 frame (electric) extractor with Resin Cage
9 frame radial extractor complete with tangential screens, able to take all types of shallow frames except Manley frames and all types of deep frames can be extracted tangentially, has a stainless steel barrel and resin moulded cage, nylon tap, two piece see through lids and enamelled legs (variable speed motor). (Includes Lids) **£1113.61**

L. 20 frame (electric) extractor
20 frame extractor with 80 watt reversible motor has a stainless steel drum and stainless steel cage, red enamelled legs, nylon honey tap complete with clear Perspex lid. **£1463.33**

A. Budget 4 Frame S/Steel Extractor MANUAL
Budget 4 Frame Stainless Steel Tangential Extractor (Manual) comes with legs and a plastic honey gate. There is 39cm from floor to bottom of tank. **£185.00**

B. Budget 4 Frame S/Steel Extractor ELECTRIC
Budget 4 Frame Stainless Steel Tangential Extractor (Electric) with Speed Control, comes with legs and a stainless steel honey gate. There is 39cm from floor to bottom of tank. **£335.00**

C. Budget 4 Frame S/Steel Extractor ELECTRIC
Budget 4 Frame Stainless Steel Tangential Extractor (Electric) with Speed Control, comes with legs and a stainless steel honey gate. There is 39cm from floor to bottom of tank. **£410.00**

D. Budget 6 Frame S/Steel Extractor ELECTRIC
Budget 6 Frame Stainless Steel Radial Extractor (Electric), reversible motor, comes with legs and a stainless steel honey gate. There is 26cm from floor to bottom of honey tap. **£565.00**

**A. 2 frame plastic extractor**

The extractor will fit two BS shallow or two Smith shallow frames, two BS Manley frames, two BS Deep or Smith deep frames, two Commercial shallow frames or two Commercial Manley shallow frames. (Actual item may vary slightly from image)

£160.00**B. 2 frame plastic extractor bundle**

Consisting of 2 frame plastic extractor + 60lb plastic honey tank and tap, uncapping roller, 3x 15lb plastic honey buckets & nylon double strainer. The extractor will fit two BS shallow or two Smith shallow frames, two BS Manley frames, two BS Deep or Smith deep frames, two Commercial shallow frames or two Commercial Manley shallow frames.

£171.00**C. Honey pump, electric single-phase motor 220 V**

HONEY PUMP with stainless steel body and food-grade 90mm rotor, complete with two stainless steel fittings for plastic-reinforced 50mm pipes. Self priming, with a SINGLE-PHASE motor, 195 pm right or left rotation. Mounted on a two-wheeled barrow. NOTE: do not run the pump without honey or water.

£1717.90**D. SMART electronic dosing machine with rotating loader 625mm**

New! SMART electronic dosing machine with rotating loader 625mm.

- Possibility of height adjustment
- Possibility of automatic and manual dosing adjustment
- Intuitive and easy to use touch screen
- Return of the drip cutter to avoid the fall of the honey
- Electronic sensor for the recognition of jars, both in glass and in plastic

£4091.23**E. Small Honey Bottling Machine**

Product Operation Steps: 1. Weight shortcut keys: M1 (500g) M2 (1000g) M3 (2500g) M4 (5000g). 2. Peeling: Press "Peeling" the filling machine's "real-time" weight reading will be zero. 3. Setting: After pressing the "setting" key, the number in the "filling" column of the display screen flashes. 4. Trigger: After pressing the "trigger" key, the number in the "trigger" column of the display screen will flash, enter the number 5~15 grams less than the empty bottle weight into the flashing cursor column, and the cursor will stop flashing when you press the "trigger" button At this time, the trigger value setting is completed. 5. Cleaning: Press the "clean" button and the equipment is reversed, and the honey in the pipeline is pumped back into the honey bucket. 6. Automatic mode: Press the Tai Chi pattern to switch to "automatic mode". 7. Manual mode: Press the Tai Chi pattern to switch to "manual mode".

£660.00**F. 28 Frame Electric Radial Honey Extractor**

28 frame electric stainless steel honey extractor, will hold 28 BS shallow frames or 12 BS deep frames, it also accepts BS Manley frames, comes complete with sturdy red legs and two clear perspex lids. This honey extractor, like all our honey extractors, has a bottom with a particular shape, designed to completely empty the honey and welded with the TIG system. The MULTIFUNCTIONAL cage in laser-cut stainless steel is very important. The new "GAMMA2" motorization has a power of 100W and a faster acceleration ramp. The new safety cover locking device allows the cover to be opened at the moment when the cage stops, without waiting. 40 mm food grade plastic tap.

B. H = 675mm D = 378mm
H = 26.5" D = 14.8"
STAND NOT INCLUDED

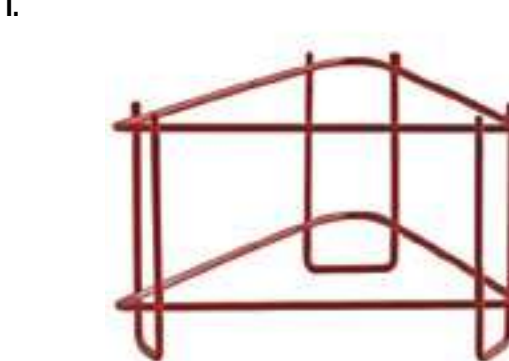

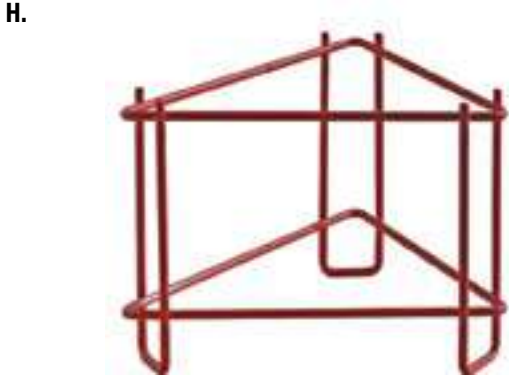

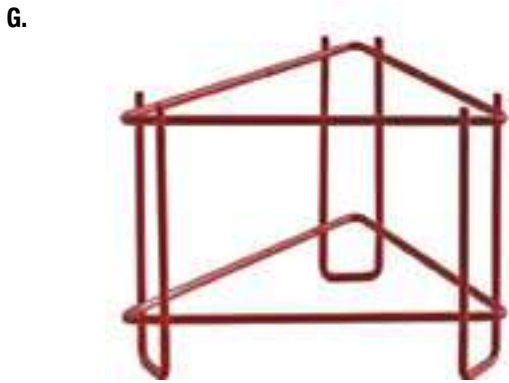

- A. 50kg S/Steel Honey Ripener & Strainer – Total Discharge**
Honey Ripener with full discharge bottom in Aisi 304 stainless steel, with a capacity of 50 kg of honey, with lid and tap. The solid structure and the great quality in the realization of Lega ripeners mean an incredible resistance over time, remaining unchanged over the years, even with intensive use. In the photo the ripener is on its metal support, sold separately. TECHNICAL DATA Tank material: Aisi 304 food grade stainless steel Welding: TIG system (in compliance with the guarantees required for steel containers in contact with food) Diameter of the ripener: Ø 310 mm Capacity: 50 kg Tap: diameter Ø 40 mm in food-grade plastic Lid: Stainless steel Full Discharge bottom INFORMATION The stainless steel ripener is the ideal product for decanting and ripening honey, an indispensable process after honey extraction because it allows impurities to be brought to the surface. The maturation of honey takes place thanks to the different specific weight of the impurities present inside the honey after honey extraction: impurities such as wax, parts of wood or organic materials will come to the surface naturally, as well as the air bubbles that are they are generated during the previous honey extraction process. **£175.78**
- C. Stand For 50kg Honey Ripener & Strainer - Total Discharge**
Painted metal support stand for honey ripener with total discharge. Height 380 mm **£34.65**

- B. 100kg S/Steel Honey Ripener & Strainer – Total Discharge**
Ripener 100 Kg full discharge in Aisi 304 stainless steel, with a capacity of 100 kg of honey, with lid and tap, Ø 378 mm The solid structure and the great quality in the realization of Lega ripeners mean an incredible resistance over time, remaining unchanged over the years, even with intensive use. TECHNICAL DATA Tank material: Aisi 304 food grade stainless steel Welding: TIG system (in compliance with the guarantees required for steel containers in contact with food) Diameter of the ripener: Ø 378 mm Height: 675 mm Capacity: 100 kg Tap: diameter Ø 40 mm in food-grade plastic Lid: Stainless steel Full Discharge Bottom INFORMATION The stainless steel ripener is the ideal product for decanting and ripening honey, a fundamental process after honey extraction because it allows impurities to be brought to the surface. The maturation of honey takes place thanks to the different specific weight of the impurities present inside the honey after honey extraction: impurities such as wax, parts of wood or organic materials will come to the surface naturally, as well as the air bubbles that are they are generated during the previous honey extraction process. **£188.29**

- A. Wooden Solar Wax Extractor (Small)**
The outer case is made of 1/2" exterior grade plywood, the internal parts are made of stainless steel for easy cleaning and no rust, there are two handles to help you move this product around the garden so it can always catch the best amount of sun. Comes with a double glazed unit. **£180.18**
- B. Small Solar Wax Extractor S/Steel Metalwork only**
comes complete with strainer grid and collection tray - 13" x 21" x 5" (330mm x 533mm x 127mm), all in stainless steel, you provide the box and glass. **£104.81**
- C. Solar Wax extractor**
This extractor is made of Stainless Steel with special interspace isolated to allow high temperatures, with internal drainer basket made of Stainless Steel also. The double tempered glass has a metal frame 700mm x 700mm, the internal parts are made of Stainless Steel and the drip tray has a capacity of 4.3 Litres. **£1086.58**
- D. Large Solar Wax Extractor S/Steel Metalwork Only**
comes complete with removable strainer grid and collection tray - 25" x 26" x 5" (635mm x 660mm x 127mm), all in stainless steel, you provide the box and glass. **£283.82**
- E. Small Poly Solar Wax Extractor**
a new small solar waxer, very economical, expressly dedicated to beginner beekeepers, who have a small number of hives but who are already having to face the problem of recovery of wax by melting, from both old honeycombs and drained opercula or any residual wax. The external structure is made up of a container moulded in EXPANDED POLYPROPYLENE, a material that has exceptional insulating properties and capable of withstanding high temperatures which through exposure to solar rays are obtained inside the waxing machine. A 4 mm thick plexiglass plate is inserted on the removable cover, which acts as the tempered glass mounted on the superior class solar waxing machines. Despite the small size, the functionality as a solar waxer is excellent, allowing you to melt the beeswax and be able to collect it to be able to sell or work it. The collection tank for melted wax is made of food-grade plastic and can hold up to 6 litres. The external structure is placed on a special support, in drawn stainless steel, with an inclination of 15°, and oriented towards the south to make the most of the sun's rays. The tests we have performed many times over the months in summer they recorded internal temperatures above 102 °C. The melting point of the wax is on average 65 °C. To make the most of the waxing machine's capacity, when you have to melt old honeycombs, it is good to remove them from the wood and then cut strips of about 10 cm. to be arranged vertically, next to each other, on the perforated support surface. **£122.00**

F. Large Poly Solar Wax Extractor

new solar waxer, very economical, expressly dedicated to beginner beekeepers, who have a small number of hives but who are already having to face the problem of recovery of wax, by melting, from both old honeycombs and drained opercula or any residual wax. The external structure is made up of a container moulded in EXPANDED POLYPROPYLENE, a material that has exceptional insulating properties and capable of withstanding high temperatures which through exposure to solar rays are obtained inside the waxing machine. A 4 mm thick plexiglass plate is inserted on the removable cover, which acts as the tempered glass mounted on the superior class solar waxing machines. Despite the small size, the functionality as a solar waxer is excellent, allowing you to melt the beeswax and be able to collect it to be able to sell or work it. The collection tank for melted wax is made of stainless steel and can hold up to 13,3 litres. The external structure is placed on a special support, in drawn stainless steel, with an inclination of 15°, and oriented towards the south to make the most of the sun's rays. The tests we have performed many times over the months in summer they recorded internal temperatures above 102°C. (considering the melting point of the wax is on average 65°C). To make the most of the waxing machine's capacity, when you have to melt old honeycombs, it is good to remove them from the wood and then cut strips of about 10 cm. to be arranged vertically, next to each other, on the perforated support surface.

G. Coiled Heater System (Thermostatically Controlled)
A complete system for cleaning honey - includes stand, thermostat and filter bag (fine only 20 microns) - Tank not included. **£147.65**

H. Standard Uncapping Tray
all stainless steel complete with lead and element and frame rest. - 22" x 14" x 4" (558mm x 355mm x 101mm). **£362.25**

I. Large Uncapping Tray
all stainless steel complete with lead and element and frame rest. - 33" x 16" x 5" (838mm x 406mm x 127mm). **£508.59**

J. Large Thermostatically Controlled Uncapping Tray
34.5" x 16" x 9.5" (876mm x 406mm x 241mm). Stainless Steel Tray. Easily adjusted operating temperature via contact thermostat & 3KW heating element. **£557.94**

K. Standard Thermostatically Controlled Uncapping Tray
23" x 14" x 8.5" (584mm x 355mm x 216mm). Stainless Steel Tray. Easily adjusted operating temperature via contact thermostat & 3KW heating element. **£445.53**

A. Standard Steam Uncapping Tray with Steam Generator
Made completely of stainless steel and comes complete with steam generator and frame rest. 22" x 14" x 4" (558mm x 355mm x 101mm). Simply attach the steam generator to the uncapping tray, fill generator with water and plug in, after a few minutes the tray will become hot enough to start processing your cappings, old combs and alike. PLEASE REMEMBER TO REFILL STEAM GENERATOR WHEN LEVEL GETS LOW. **£347.38**

B. Cold Uncapping Tray
Comes complete with stainless steel frame holder with perforated base which sits above plastic tank with honey tap and stainless steel frame holder for holding frames after they have been uncapped before going into extractor. **£138.92**

C. Uncapping tray, 65x48x30 cm, stainless steel
Stainless steel uncapping tray size 65x48x30 cm, supplied complete with lid, inner dripper, wooden bar with knife rest, legs and plastic honeygate diam. 40 mm underneath. Simply hang frames in the tray after uncapping until extracting time. **£366.12**

D. Spare Element & Lead for Uncapping Tray **£34.03**

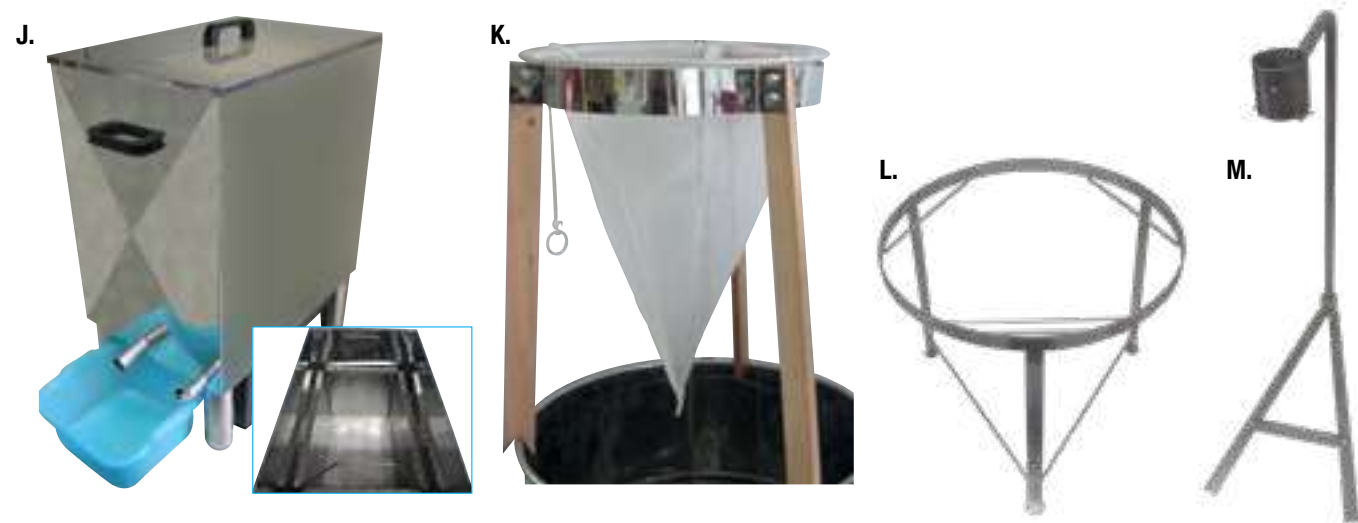

E. Uncapping Roller
Simple but ingenious method of uncapping, roll over the sealed comb, the spikes will penetrate the cappings to reveal the honey then simply extract. **£11.81**

F. Honey Knife (Straight)
Our standard knife has a cranked handle with plain edges on both sides. **£27.09**

G. Honey Knife (Bent)
Our knife is bent on the end for those awkward places with a cranked handle and a blade which is serrated on both edges. **£28.80**

H. Sump tank, stainless steel, double walled, 1300x515x300mm
SUMP TANK, entirely made from AISI 304 stainless steel, double-walled, designed to collect honey straight out of the extractor with immediate removal of coarse impurities. The interspace between the two walls contains water, which is heated by a thermostatically controlled resistance heater: honey is heated and made more fluid thus making cleaning operations easier. The inner bottom is inclined towards the honey gate to ensure complete discharge of the tank. The top part consists of a removable coarse strainer. The tank is equipped with 5 mobile vertical partitions, fitted according to an alternate high-low pattern to create a 'syphon' effect: while honey is fed through them it undergoes finer, progressive cleaning according to differences in specific gravity. The tank comes complete with a 50mm suction pipe to suck honey in by pumping. **£1649.44**

I. Frame Holder to hold uncapped frames, stainless steel
Stainless steel uncapping frame holder to hold the frames during uncapping operations, suitable for use with the stainless steel uncapping tray **£55.46**

N. Inside dimensions:
99x49x34 cm
2.3kW/230V
Weight: 59 kg

O. 2000W/230V,
diameter: 55 cm,
height: 85 cm,
weight: 20 kg

P.

J. S/Steel Steam Wax Extractor (XL)
stainless steel with Gas Burner suitable for
reducing old frames, scrapings etc.

£891.87

K. Stand Support & Fine Filter Bag only
(20 microns)

£21.55

L. Stand for Dana Api Mini
Cappings Melter

for use with N above

£270.48

M. Stand for Dana Api Thermo Melter

for use with O above

£68.19

N. Dana Api Melter

Stainless steel construction with a double
walled, insulated vat. Dana api melter has
two separately controlled heating elements:
One on the bottom and one at the top under
the lid. It has a powerful fan built into
the lid, which ensures an even and quick
distribution of heat in the vat and a smooth
extraction of honey from your cappings
wax.

£4639.39

O. DANA Api Mini-CAPPINGS MELTER

is a round vat made of stainless steel with
a perforated bottom insert. The DANA api
Mini-CAPPINGS MELTER is equipped with
a powerful heating element under the lid
and a fan that ensures a quick and even
heat distribution. With this system you will
be able to recover honey from the cappings
wax without destroying the fine quality and
taste of your honey. In fact, this yummy
gold will not only be good enough to eat it
will be good enough to sell.

£1596.60

P. DANA Api THERMA MELTER

is a thermostatically controlled stainless
steel liquefier. This melter has been
designed to melt honey in a gentle, yet
efficient way. The melter is positioned
on top of the crystallized honey in the
container. After only a few hours of
operation, the melter will have liquefied
even heavily crystallized honey. You can
also use the melter to keep your honey at
a desired temperature for example before
bottling. As you all know, it can sometimes
be difficult to get all your honey bottled
during the height of the honey season. With
the Dana api Melter you can leave your
honey unbottled over night without having
to worry about undesirable crystallization.
Technical data: The melter works at 230V.
The thermostat can be freely adjusted to any
temperature between 30 degrees C and 85
degrees C or set to an anti-freeze position
(F). 21 cm, 350W and the 28cm, 400W.

21cm - £445.64
28cm - £503.72

I.

A. Steam Wax Melter (Electric)

The wax melter can contain up to 15 brood
frames or an equivalent number of supers
or cappings. It enables to recover the wax
without having to cut away the comb from
the frame. The frame wire will remain intact
allowing still good frames to be re-used.

£852.91

B. Small S/Steel Steam Wax Extractor
with Steam Generator

Made completely of stainless steel. Size 18"
x 9". Place dirty wax and old comb into the
basket, simply attach the steam generator
to the wax extractor, fill generator with water
and plug in, after a few minutes the wax
extractor will become hot enough to start
processing your dirty wax, cappings, old
combs and alike. PLEASE REMEMBER TO
REFILL STEAM GENERATOR WHEN LEVEL
GETS LOW.

£341.29

C. Large S/Steel Steam Wax Extractor
with Steam Generator

Made completely of stainless steel. Size 25"
x 12". Place dirty wax and old comb into the
basket, simply attach the steam generator
to the wax extractor, fill generator with water
and plug in, after a few minutes the wax
extractor will become hot enough to start
processing your dirty wax, cappings, old
combs and alike. PLEASE REMEMBER TO
REFILL STEAM GENERATOR WHEN LEVEL
GETS LOW.

£448.67

D. Conical Tap Strainer

made in stainless steel with coarse strainer.

£31.88

E. S/Steel Double Slide Strainer

approximately 9" in diameter with adjustable
arms.

£26.53

F. Nylon Double Strainer

a very popular and inexpensive alternative to
the stainless steel double slide strainer made
in food grade plastic.

£13.46

NEW

J. Conical Filter Bag

Available in fine or superfine for straining honey (used with the stand support) each **£7.65**

K. Butter Muslin

approx 800x800mm/80x80cm for straining honey.

L. Refractometer – MANUAL

this model is specially designed to measure Brix, Water content and Baume' in honey. Just a few drops of honey can quickly and accurately judge the quality of honey. A must-have tool for every beekeeper. Package list: 1x ATC Refractometer 2x Pipettes 1x Mini-screw driver 1x Protective carrying case 1x manual 1x clean cloth. **£36.50**

Refractometer – DIGITAL

package list: 1x ATC Digital Refractometer 1x Mini-screw driver 1x Protective carrying case 1x manual 1x clean cloth Very easy to use, lightweight and compact. Complete with a hard storage case. Full instructions supplied. **£167.00**

M. Honey/Wax Separator

A stainless steel bucket which is placed under the uncapping tray outlet, as the honey cools the wax floats on top of the honey, honey can now be poured from the spout. **£108.13**

N. Honey Filter (250 Micron) Fine

Approx Square Metre with a cotton edge to stop fraying. Made of professional food grade certified nylon. Durable and reusable. **£30.00**

O. Honey Filter (500 Micron) Coarse

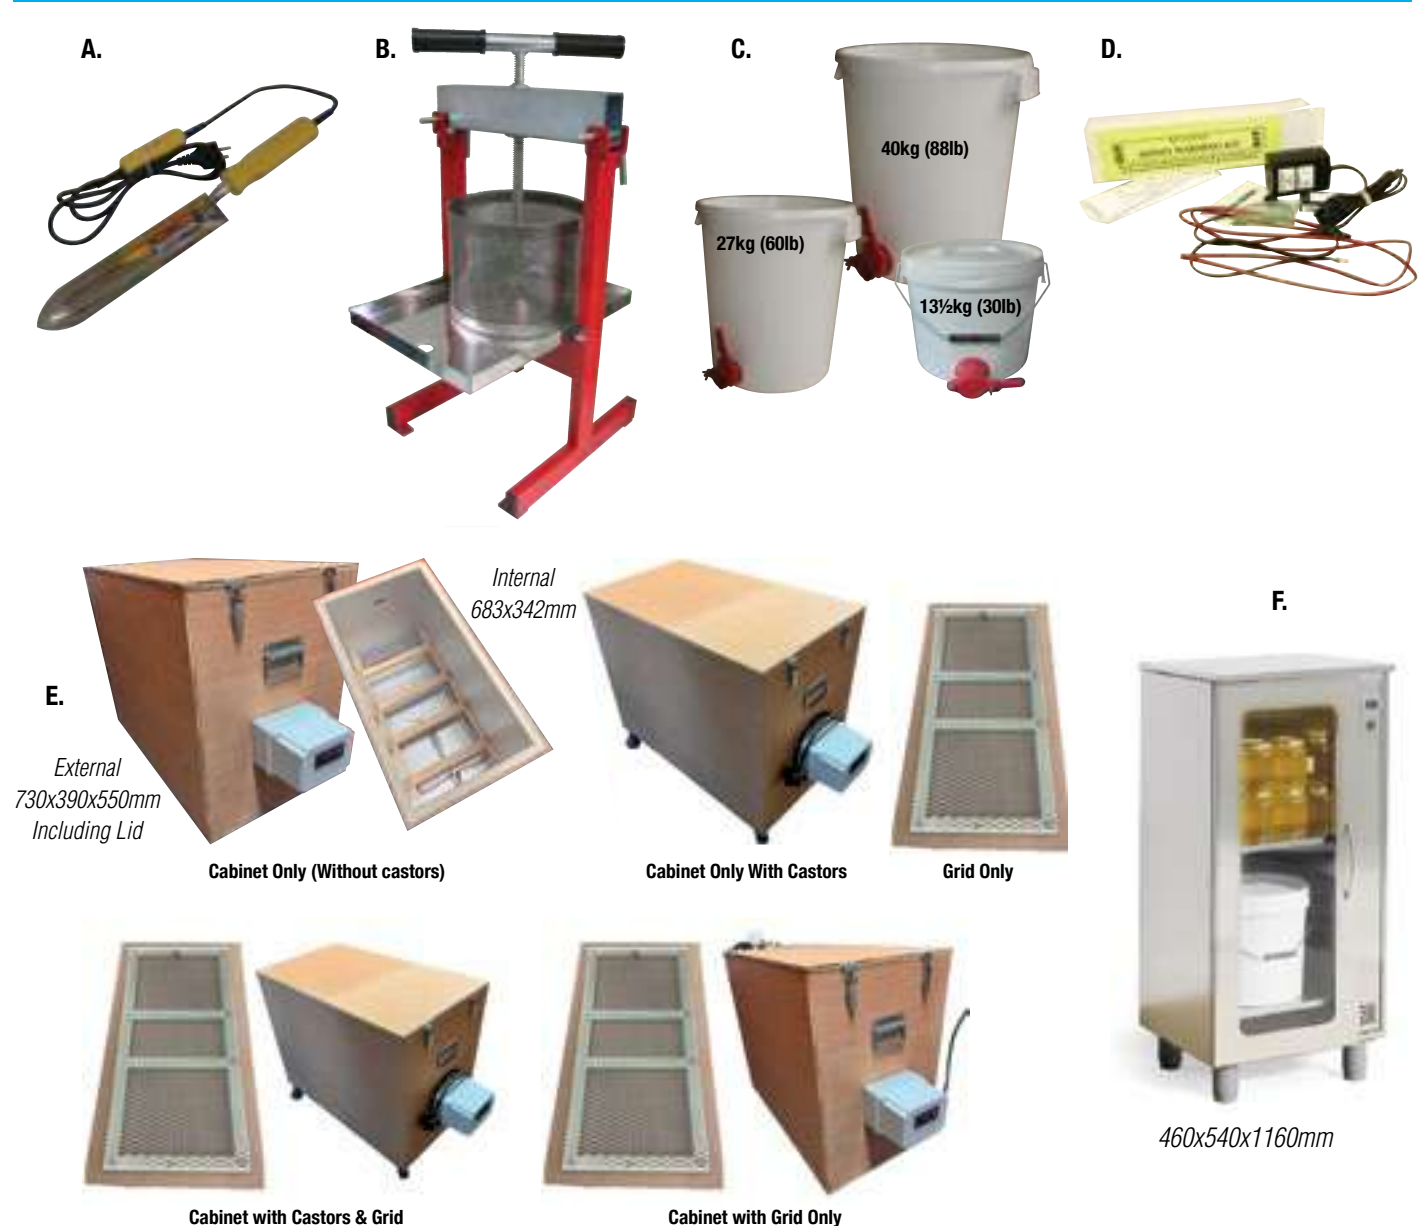

Approx Square Metre with a cotton edge to stop fraying. Made of professional food grade certified nylon. Durable and reusable. **£30.00**

P. Spare Nylon Mesh For Honey Double Filter In 3 Parts

Replacement nylon mesh 275 micron for Honey Double Filter in 3 Parts. The nylon cloth filter is the most suitable tool to filter the honey from the impurities present inside the honey deriving from the honey extraction; impurities such as pieces of wax, small fragments of wood or organic parts of insects. The nylon cloth bag allows a very effective filtering, specially designed for honey. **£18.26**

Q. Honey Double Strainer In 3 Parts - For 50kg/100kg/200kg S/Steel Honey Tank

Stainless steel double strainer, for 50/100/200 Kg honey ripeners made up of 3 parts: stainless steel rough strainer, 275 micron nylon cloth and stainless steel structure diam. 350 mm with 3 bending supports for diam. 500 mm tanks. Necessary to filter the honey after honey extraction, to remove the impurities present inside the honey, such as pieces of wax, wood residues of the frames and organic parts of insects. Once the honey has been extracted, the honey must then be filtered before passing to the ripener for decanting. The nylon cloth bag allows a very effective filtering, specially designed for honey. The filter and the folding supports are in food-grade stainless steel, in full compliance with the regulations on equipment in contact with food. The nylon cloth bag and the steel filter can be replaced and purchased separately. **£94.38**

A. Electric Uncapping Knife

a very light and slender tool, a joy to work with, the best we have come across. **£135.79**

B. Honey/Heather Press

all metal construction with stainless steel basket. **£570.88**

C. Plastic Honey Tank with Tap & Lid

these food grade plastic honey tanks will hold approx 27kg, 40kg or 80kg of honey, comes supplied with a nylon honey tap and back nut. **13½kg (30lb) £22.92**
27kg (60lb) £25.47
40kg (88lb) £35.24

D. DIY Thermostat Kit

this kit is exactly the same as what goes into our thermostatically controlled warming cabinet, comes with instructions on how to fit. **£100.01**

E. Digital Thermostatically Controlled Warming Cabinet

Cabinet Only (Without castors) £396.00
Cabinet Only With Castors £435.60
Cabinet with Castors & Grid £477.60
Cabinet with Grid Only £438.00
Grid Only £42.00

An accurate way of controlling the temperature of your honey when bringing it back to liquid for bottling, includes a temperature indicator strip which glows when the cabinet reaches the correct temperature. Internal Dimensions 34cm WIDE x 68cm LONG x 32 ½ cm DEEP / External Dimensions 73cm long x 55cm high x 39cm wide. Will hold 2 x 30lb buckets of honey, the heat is provided by 100 watt heating cable, there is a stainless expanded mesh grid (68cm long x 1.7cm high x 33.5cm wide) available which will hold jars of honey at an additional cost and an upgrade of 4 heavy duty lockable swivel castors.

F. Small Warming Cabinet Stainless Steel

Honey warming cabinet with insulated walls to make crystallized honey liquid. This electrically heated cabinet allows you to always have liquid honey. It can hold 2 drums of 25kg or 72 jars of 1kg (2lb jars) which are slowly heated by the forced circulation of hot air supplied by thermostatic electric resistances and cause the liquefaction of crystallized honey. The cabinet is made of stainless steel and has a transparent door with magnetic closure. Through this procedure the honey returns to liquid in the 1kg jars within 4/6 hours and the labels are not damaged. The cabinet has an elegant and space-saving line, thanks to its vertical shape. The digital controls on the display are easy to understand and use. 460x540x1160mm. **£1473.23**

A. Apiguard
thymol based treatment for varroa control, comes in a box of 10 trays which is enough for 5 hives.
per box £28.48

B. Apiguard Eke
a small extension suitable to go on top of a national brood chamber to provide extra room for apiguard and candy.
cedar flat £10.90
cedar assembled £16.81

C. Api Life Var
is the organic solution for the treatment & prophylaxis in the fight against varroasis in bees & against tracheal mites. Works by contact & suffocation from vapours of essential oils, parasite will detach & fall from body of the bee. Totally safe. Treatment requires 4 bars (2 packs).
2 bars per pack £3.51

D. Apistan
treatment for varroa control, comes in a pack of 10 strips, 2 strips per hive, enough to treat 5 hives.
per pack £26.05

E. Thymol Crystals
treatment for the control of varroa, acarine and chalk brood, used as an anti-fungicide in syrup feeds.
100g £9.90
500g £27.56

A. Acetic Acid
is known to be effective as a sterilising agent against nosema and also helps with the problem of wax moth. **COLLECTION ONLY**
1 litre £28.35

B. Hive Alive
strengthens bees against Nosema, Chalkbrood, Viruses & Varroa. 100% natural, includes marine extracts, thymol & lemongrass oil. easy to use.
100ml treats 5 hives £17.25
500ml treats 25 hives £66.70

C. Api-Bioxal
Api Bioxal is the new Veterinary Medicine against the Varroa mite.
35g sachet treats 10 hives £14.10

D. Oxalic Acid Tablets
for use with the oxalic acid vapouriser.
160g (100 x 1.6g) £14.10
750g (500 x 1.5g) £42.45

E. Syringe
ideal for the use of oxalic acid. **£2.03**

F. Oxalic Acid Vaporiser
Push the silver end into the front of the hive with two oxalic acid tablets on top, connect the two clips to the car battery, this will then vapourise the two tablets into the hive, this method can be used at temperatures as low as -10°C with very little mortality rates compared to the trickle method. **£146.06**

G. Oxalic Acid Crystals
ideal to use in the vapouriser.
300g pot £4.54
1kg pot £9.07

H. Sfera Hornet & Wasp Trap™
An ingenious device for attracting and killing various kind of flying pests: midges, mosquitos, common flies, fruit flies, olive flies, wasps, hornets, *Vespa velutina* (Asian hornet) lepidoptera, etc.
NB: do not use on flowering plants. Sfera Trap™ can be used in all environments, both inside and outside. Beside its yellow color - which attracts flying pests during the day - it possesses a feature that makes it unique of its kind: a LED light that attracts flying pests at night. The LED luminaire is powered by two AA batteries (not provided) which have a life of about one month. Indoor, Sfera Trap™ prevents flying pest infestations in barns, stables, milking rooms, greenhouses, grain and food warehouses, etc... Outdoor, Sfera Trap™ is very effective in catching flying pests in orchard, olive groves, vineyard, gardens, campsites, country houses, etc. Sfera Trap™ consists of two hemispheres, one of which with the latching ring. Both hemispheres are fitted with a luminaire seat, to allow for the choice of the position of the light - from above or below.
SFERA TRAP
After inserting the two 1.5V AA batteries (not included), insert the luminaire into its seat inside one of the semispheres. Sfera Trap is now ready to be assembled -
How to do it
Before applying the glue, wrap the sphere with a transparent plastic film (such as cling film, or two clear shower cups); then apply a suitable glue.
In the event of loss of adhesion, the glue can be reapplied several times.
In addition to using only glue, or glue and attractants on it, Sfera Trap can also support insecticides and pheromones.
Practical advice: Use disposable gloves in the preparation of the sphere and the various products used. To avoid damage from possible spillage of glue, place a protective sheet underneath the sphere, such as cardboard or paper. In the eventuality of glue spillages these can be removed using white spirit or turpentine.

£36.41

JAR NOT INCLUDED

I. Hornet and Wasp Trap - FOR GLASS JAR
This trap is a newly marketed trap for catching harmful insects, also designed with in mind the need and benefit of recycling common containers.
Can be screwed onto recycled 1kg (2lb jar) glass honey jar (NOT INCLUDED)
Made of tough plastic material and consists in two parts: a funnel, to be positioned on the top of the jar (so as to prevent captured insects from flying out) and a lid which screws onto the jar (so as to protect the bait from rain) and has 6 regular gaps (so as to let the insects in).
Can be hung on tree branches or other supports, or it can be placed on a shelf or on the ground. Its stylish shape and flat base make this trap particularly suitable for outdoor spaces such as gardens, camping sites, terraces and boats.
It offers yet another effective and environmentally friendly solution to attracting insects: a solution which is harmless to people, pets and good insects.

each £3.25
per pair £6.13

BOTTLE NOT INCLUDED

J. Hornet and Wasp Trap - FOR PLASTIC BOTTLE - Designed to fit on a standard plastic bottle.
"the top-trap" has been used successfully for many years, both nationally and internationally, for controlling flying pests in orchards, vineyards and all kind of farming. It is made of tough, durable plastic material. Hooked onto a recycled plastic water bottle (filled with half a litre of bait mixture) and hung on branches of the plants to be defended, this trap becomes an economical, effective and environmentally friendly bio trap.
each £3.25
per pair £6.13
K. Wasp Trap
Fill with a sticky sweet liquid and the wasps will enter the trap via the hole in the bottom, once inside they will try to leave through the clear lid and then perish.
£7.86
L. 2lb (1kg) Glass Jar for our Hornet & Wasp Trap
Please note: Glass Jars are sent at the consignees own risk. We regret neither ourselves or the carrier will take responsibility for breakages.
£1.19

M. Swarm Lure
a pheromone which attracts passing swarms to your hive.
STORE IN FREEZER.
pack of 2 £4.00
N. Bee Quick
is a non toxic blend of natural oils & herb extracts for clearing bees from supers, it is safe to use for bees and the beekeeper.
236ml £15.75
3.8 litre £149.99

O. Swarm Attractant Wipes
comes in a small sachet resembling a cleansing wipe. It is impregnated with essential oils and can be hung in or wiped over an empty hive, skep or container. Helps attract passing swarms and reduce risk of swarms leaving.
Pack of 10 £14.05

- B. Dulcofruct Liquid Bee Syrup**
Is recommended in feeding the bee families in the harvesting free period.
To be used for stimulating the bee's families and to refill the food reserves (hot season).
This product DULCOFRUCT mark has been specially created to ensure the bees a stimulating feeding, without containing any kind of sugar.
DULCOFRUCT – supplement- doesn't crystallize in time, eliminating the risks of solidification and can be kept/stored at any temperature away from the direct sunlight (max.50°C)
The shelf life of the product is 12 months from the date of production.
Advantages of using this product:
- inverted product 100% – doesn't wear out the bees
 - no crystallization in time – eliminates the risk of food solidification
 - ergonomic packaging – favors easy handling
 - premium quality – doesn't create the phenomenon called "robbing" between bees
 - Successfully used in beekeeping for 5 years now!
 - High on fructose!
- | | |
|------|--------|
| 13kg | £20.90 |
|------|--------|

- A. Ambrosia Bee Candy (zero rated)**
a ready to use fondant paste for feeding consisting of sugar, glucose and fructose.
- | | |
|-----------------------|---------|
| 2.5kg bag | £9.30 |
| Per box (2.5kg x 5) | £45.51 |
| 50kg carton (4 boxes) | £154.51 |
| Pallet (64 boxes) | £P.O.A |
- B. Dulcofruct Bee Candy (Solid Energy Supplement)**
This product DULCOFRUCT mark has been tested for the last two years before it was placed on the market. It was specially made to ensure bee feeding in the cold season. DULCOFRUCT candy is a 100% inverted product that offers the bee the possibility of a smooth digestion, the bee maintaining its energy. The product is extracted from maize (NON GM) that has in its composition: fructose, glucose, other sugars, water and a dry substance of max. 84%. DULCOFRUCT candy has a creamy consistency (can be easily cut with a knife) and can be easily digested by the bees, being solidified so it doesn't melt in the hive.
Advantages of using this product:
- Inverted Product 100% – Doesn't Wear Out The Bees
 - Low pH – Prevents Nosema Apis
 - Ergonomic packaging – favors easy handling
 - Creamy consistency – easily assimilated by the bees
 - Successfully used in beekeeping for 5 years now!
 - High on fructose!
- | | |
|---------------------|--------|
| 1kg bag | £2.20 |
| 10kg box (10 x 1kg) | £20.74 |
- C. Dulcofruct Bee Candy With Plant Extract**
The products was created to ensure the bees feed in the cold season, with the benefits of natural plants, that can be found in the composition of this product: thyme, chamomile, nettle, peppermint, yarrow, St. John's worth, calendula, lemon balm, basil, wormwood.
Administration mode:
- To be used as bee food during the cold season
 - To be placed above the frames in the hive
- Advantages of using this product:
- Inverted product 100% – doesn't wear out the bees
 - Contains 10 plants – improves the immune system of the bees
 - creamy consistency – easily assimilated by the bees
 - Low pH – Prevents Nosema Apis
 - Over 300.000 bee families feed in Romania and abroad.
 - High on fructose!
- | | |
|---------------------|--------|
| 1kg bag | £2.42 |
| 10kg box (10 x 1kg) | £22.74 |
- D. Dulcofruct Bee Candy (Super Protein Candy)**
This product contains 20% ApiPollen Substitute, with a perfect carbohydrates balance (fructose, glucose, sucrose), also with a high protein content (raw protein 10%) that assures the explosive development of the bee family. It represents the complete solution between nectar and pollen. Contains probiotic that helps for the perfect assimilation of protein and the hole ensemble of microelements that are needed for the fast development of the bee family's power.
Administration mode: To be used as food in the spring, after the cleansing flight, and in the autumn for forming the fat body and to prepare the bee colonies for the winter period.
- | | |
|---------------------|--------|
| 1kg bag | £3.85 |
| 10kg Box (10 x 1kg) | £34.10 |
- E. Candipolline Gold**
New protein food for bees, with gamma-ray sterilized pollen.
- | | |

Feeders inc. VAT & Bee Feed (Zero Rated)

A. Jumbo Feeder
made of plastic, fits inside an empty National super, however, the feed hole in your crown board will have to be altered.
£17.94

B. 4 pint rapid feeder
a simple 4 pint feeder which fits inside an empty super, very popular with the hobbyist beekeeper.
£7.01
Spare Cups (each) £1.16
Spare Lids (each) £2.10

C. Attachment Feeder
for 1lb jars (jar not included).
£2.00

D. Plastic Contact Feeder
this simple bucket feeder is to be filled with sugar solution, when turned upside down it airlocks and the bees can take the syrup from the gauze in the lid.
¼ gallon each £5.08
¼ gallon (10+) each £4.58
½ gallon each £6.16
½ gallon (10+) each £5.56
1 gallon each £7.34
1 gallon (10+) each £6.60

E. Maisemore Jumbo Rapid Feeder
Will hold when full 3.5 gallons of syrup, clearly marked on the inside for more accurate feeding, has two feed holes which are ribbed inside and out to give the bees good grip. Made of hardwearing food grade plastic and is UV and frost resistant. Nat & Comm.
£34.64
Spare Cups (each) £2.08
Spare Lids (each) £6.17

F. BS Frame Feeder
holds approx 4½ pints of syrup, made of hardwearing food grade plastic and is UV and frost resistant and comes with a plastic float.
NEW IMPROVED DESIGN -
Now ribbed inside to enable the bees to climb more easily
£14.36

G. Langstroth Frame Feeder
made of durable plastic, holding 3 litres, the inside is corrugated, which gives the bees a better grip and prevents drowning. Includes 2 clips which ensure that the opening stays open. Made of food grade plastic.
£12.10

H. Entrance Feeder including Plastic Jar
Includes plastic jar, suitable for feeding liquid syrup, for a hive opening of 8mm high x 40mm in length, don't forget to fix the jar on the feeder with wire or elastic band as jar can fly away with the wind.
each £4.54

I. Miller Feeder (Cedar)
available in National, Commercial, WBC, Langstroth & M.D. Similar to the Ashforth feeder but with advantage of the feed slot running the whole width of the hive & in a central position, bees can also take feed from two sides of the feeder offering a better intake of food than the Ashforth, we ourselves use the Miller Feeder.
£76.46

Smokers inc. VAT

We offer a range of smokers made from galvanised steel, stainless steel and copper, they come in various sizes; the Empire and Etna both being made of stainless steel and with a guard, Etna standard and Etna large being made of galvanised steel, and the Empire standard being made of copper. We ourselves use the Etna stainless steel large with guard as it is easy to get your hand into for cleaning and the guard protects you if you should hold the smoker in between your knees as we do.

A. Empire S/Steel Large with Guard £49.17
B. Empire Copper Standard £43.02
C. Etna Galvanised Standard £30.77
D. Empire S/Steel Smoker £44.17
E. Etna S/Steel Large with Guard £49.17
F. Etna Galvanised Large £40.51

G. Etna 4x10" Stainless Steel Large Smoker with Guard & removable fuel chamber
Large stainless steel smoker with guard comes with a removable fuel chamber for easier lighting and cleaning.
£52.00
H. Empire S/S Electric Smoker Large with Guard inc. Batteries £23.10

I. Smoker Bellows
available in two types, bolt and screw on.
£10.21
J. Smoker String
available in ½ kg bags, very easy to light and continues smouldering for long periods and is the smoker fuel we use.
1/2 kg £3.71

K. Apicalm
lavender based smoker fuel, formed into pellets, gives a lavender scented smoke
1 kg £4.88
L. Smoker Cartridge
corrugated card shaped and cut to size to suit your smoker.
standard £0.55
M. Smoker Grids
for Etna Standard 7x2½cm & Large Galvanised smokers 8¾x2¾cm only.
Each £2.10

Hive Tools & Hardware inc. VAT

A. Hive Tool Standard
a mild steel tool painted yellow, slender and easy to use.

£10.63

B. Hive Tool S/Steel
a stainless steel tool, slender and easy to use.

£11.95

C. Frame Lifter (Standard)
made of mild steel and painted yellow.

£10.82

D. Frame Lifter (Heavy Duty)
made of stainless steel..

£11.38

E. Frame Grip
A spring loaded device ideal for gripping a frame with one hand

£12.27

F. Uncapping Fork (Straight)
A popular & easy uncapping method. Use cold with a zig-zag action cutting just under the cappings. Rinse occasionally in hot water & wipe dry.

£7.95

G. Uncapping Fork (Cranked)
A popular & easy uncapping method. Use cold with a zig-zag action cutting just under the cappings. Rinse occasionally in hot water & wipe dry. Cranked needles assist in lifting cappings clear of comb.

£8.57

H. Spring Fasteners
a simple metal spring held in between three screws ideal for holding hive parts together.

per pair £2.60

per 10 pairs £23.77

I. Manipulation Cloth
Made of canvas with stainless steel rods at each end to weigh the cloth down and is used to put over the frames of the brood chamber to allow a frame to be taken out at one time.

£23.14

J. Bee Brush
an extra long brush with extremely delicate hairs, an ideal tool for brushing the bees off the frames.

£9.00

K. Series of Hive Numbers
be organised in the apiary, used for numbering your hives so you can keep a check of the activity of your bees.

£2.03

Hive Straps
the best method for holding hives together when being moved, comes with 3m of 25mm wide strapping.

L. Standard £6.12

M. Ratchet £6.83

N. Economy £3.68

O. Mesh
used for making your own open mesh floors, travelling screens or repairing old lids, both in sizes 18" x 18" squares.

Galvanised £4.61

S/Steel £13.34

P. Stainless Steel Uncapping Fork (Cranked)
with plastic handle see item F.

£11.76

Q. Frame Cleaner
for cleaning the groove in your side bars when re-waxing old frames

£6.05

R. Wire Excluder Cleaner
for easier cleaning of wire queen excluders

£10.40

S. S/Steel 'Claw' Hive Tool
210mm Long

£13.36

T. S/Steel 'Amy' Hive Tool
185mm Long, 26mm Wide (Scraper End)

£11.60

U. S/Steel 'Z' Hive Tool

£5.00

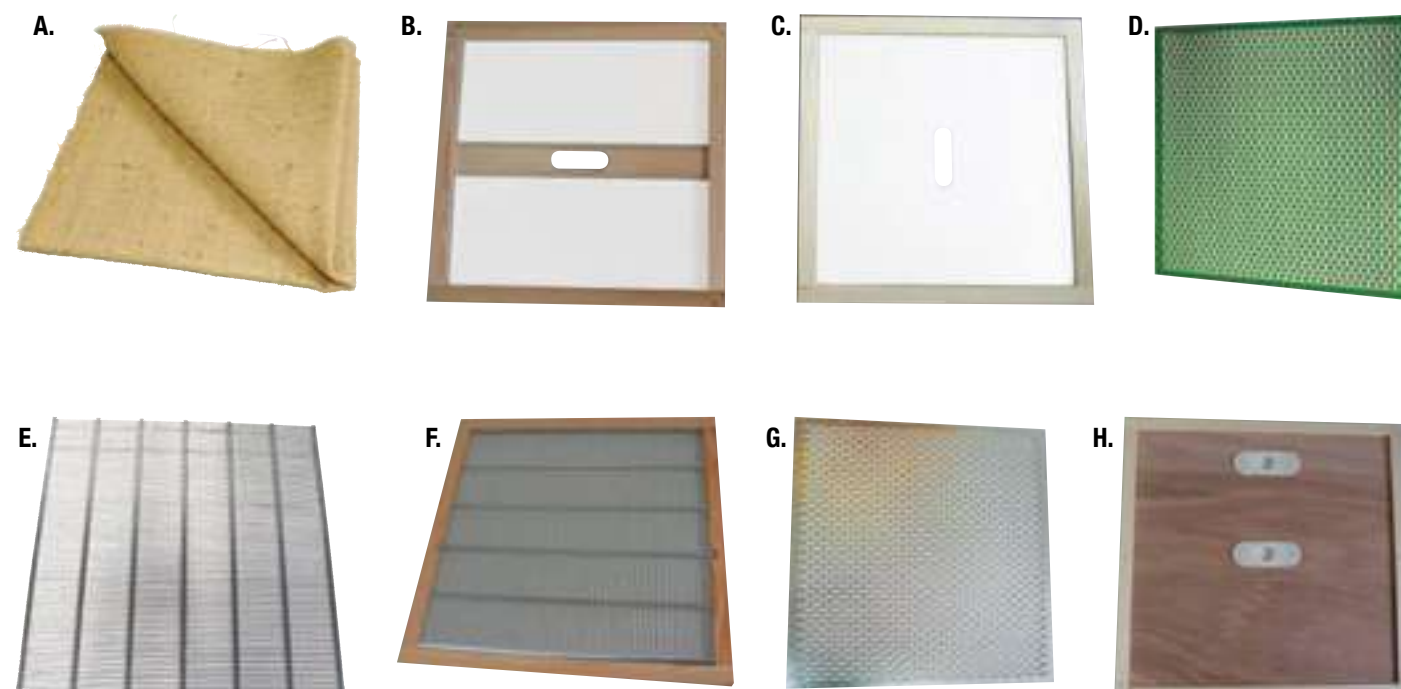

V. Uncapping Fork Slicer

£10.95

W. Adnor Frame Saver
It separates the bottom bars, cleans the wax channels, separates the top bar and resets the frame pins, what more can you want from a tool!

£22.00

Parts & Accessories inc. VAT

A. Heavy Jute Quilt

this heavy jute can be cut to any size you require, we ourselves use this product on our bees as it is easy to peel one corner to look into the hive and also easy to cut a small feed hole in the centre.

£4.61

B. Glass Quilts

a simple device which lets you look into the hive to see how your bees are doing and can also be used as a clearer board, supplied with a hole to take a porter bee escape

National, Commercial & W.B.C.

£21.31

C. Polycarbonate Quilts

in National, Commercial and WBC, plain or with a hole for a porter bee escape, hundreds of times stronger than glass, offers better insulation & will not cause condensation.

plain £22.39

with hole £23.12

D. Plastic Queen Excluder

very strong and virtually indestructible. Available in 3 sizes with round edges so the bees don't damage themselves while moving around the hive.

National, Commercial & Langstroth

£5.95

E. Wired, Unframed Queen Excluder

this enables you to make your own frame if you should wish but they are designed to go straight onto the hive.

National, Commercial & Langstroth

£12.67

F. Wired, Framed Queen Excluder

the round wires are accurately spaced in a metal frame, secured into a wooden frame, rounded wires ensure no damage is caused to the bees.

National, Commercial, W.B.C., MD, Langstroth & Smith

£22.61

G. Slotted Steel Queen Excluder

this is the queen excluder we use ourselves, made from a galvanised sheet stamped with our own tooling.

National, Commercial & W.B.C.

£8.57

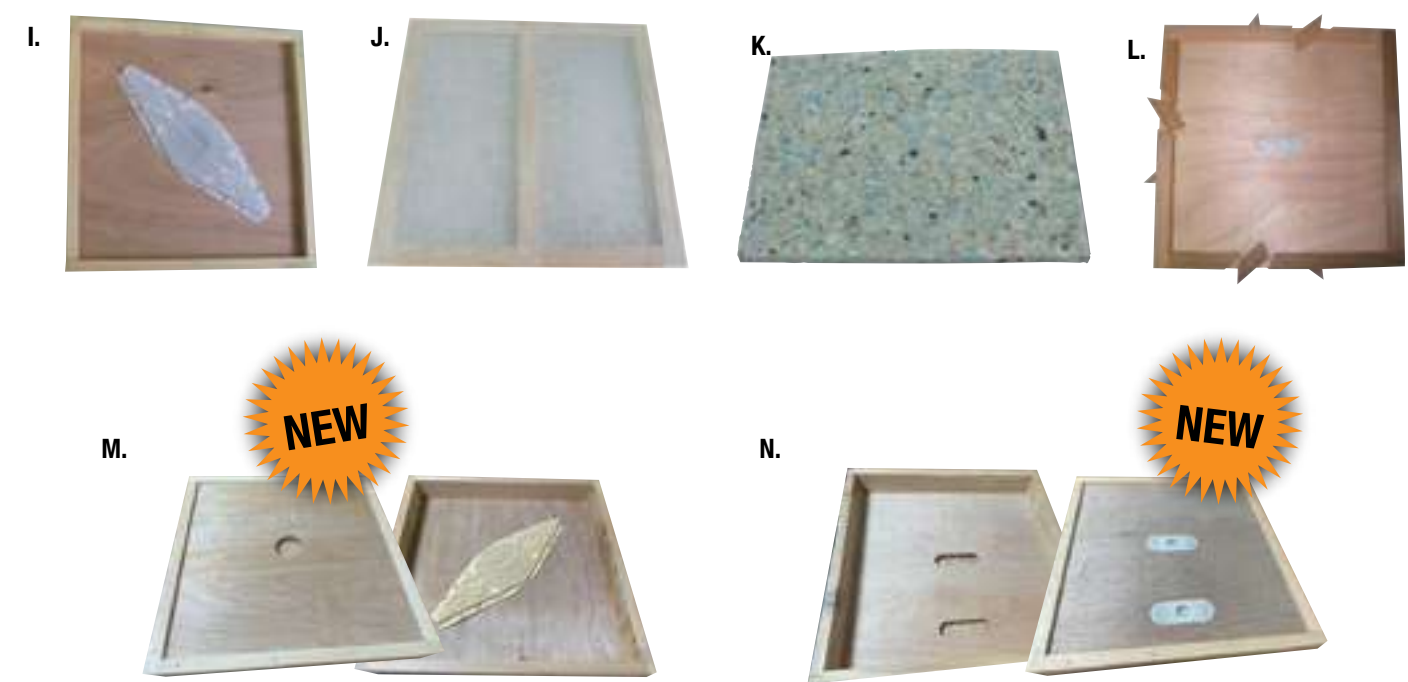

H. Crown Boards (inc. Porter Bee Esc)

made from 6mm exterior ply and then framed with redwood batons, available in all sizes.

National, Commercial, W.B.C., MD, Langstroth & Smith

£17.22

Parts & Accessories inc. VAT

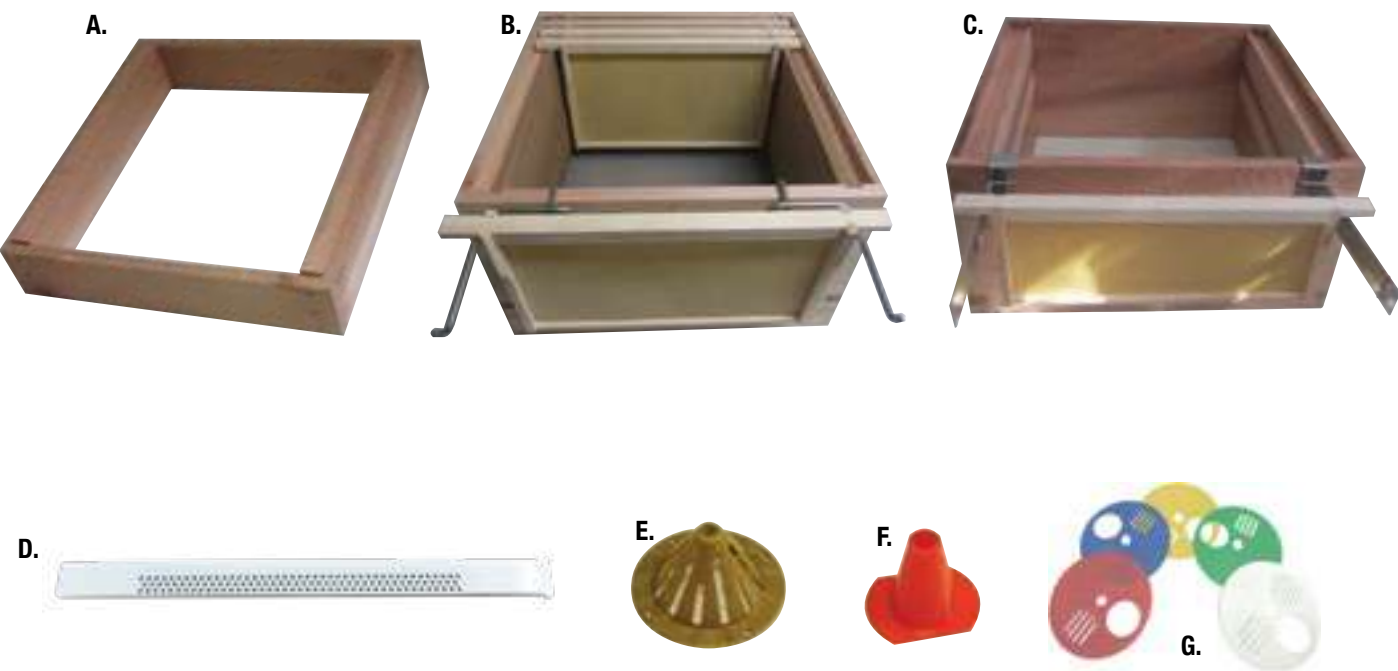

- I. Rhombus Clearer Board**
our preferred method of clearing our bees, a simple 6mm plywood board in a wooden frame with a large hole drilled centrally with a rhombus escape, no moving parts so there is nothing to be clogged by the bees.
National, Commercial & W.B.C. £18.19
- J. Travelling Screens**
available in National and Commercial, a redwood frame with perforated galvanised mesh stapled to it gives the full hive ventilation. £22.68

- K. Insulated Quilt**
20mm thick and made from recycled foam, fits inside an eke, super or brood chamber to help keep your bees lovely and warm, available in all hive sizes, National, Commercial, WBC, Langstroth, M.Dadant & Smith.
National, Commercial & W.B.C, Langstroth, M.D & Smith. £3.77
- L. Snelgrove Board**
an ingenious invention that helps stop your bees from swarming.
National & Commercial £45.22

- M. National Rhombus Multiboard**
both boards do the same job but using a different type of bee escape, they can be used as a clearer board and as an eke for treating with Apiguard and when the escape is removed they can be used as a cavity to feed candy.
National, Commercial £24.00
- N. National Porter Bee Escape Multiboard**
both boards do the same job but using a different type of bee escape, they can be used as a clearer board and as an eke for treating with Apiguard and when the escape is removed they can be used as a cavity to feed candy.
National, Commercial £24.00

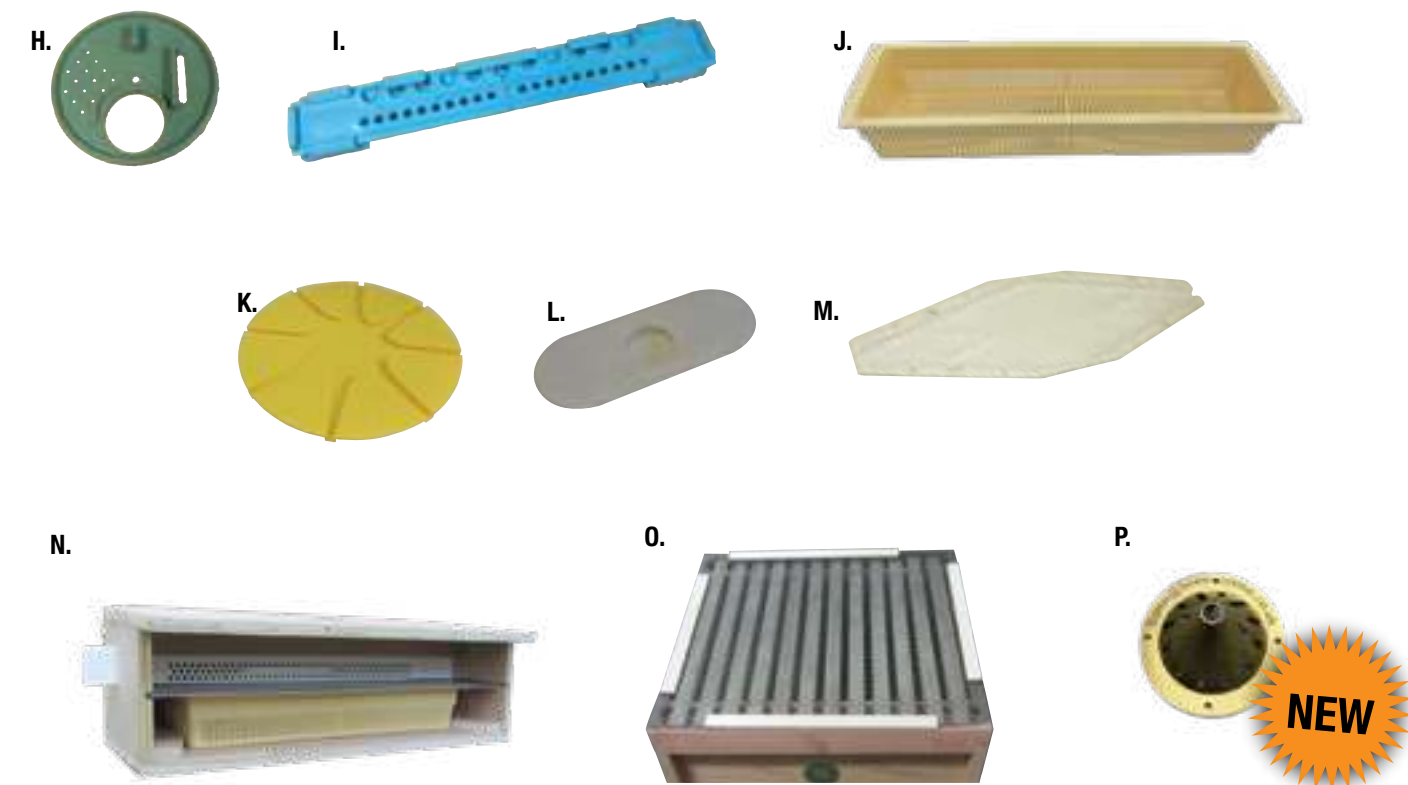

Parts & Accessories inc. VAT

- A. National 14x12 Eke**
a cedar wood extension piece that fits underneath a standard national brood chamber providing extra depth to take 14 x 12 frames
Cedar Flat £35.54
Cedar Assembled £46.46
- B. S/Steel Frame Rest**
totally made of stainless steel and holds 3 frames comfortably.
National, WBC, 14x12, Langstroth, M.Dadant £24.27

- C. Stainless Steel Economy Frame Holder**
holds 3 frames comfortably £10.55
- D. Pollen Screen (National only)** £1.94
- E. Cone Escape**
cone used for a W.B.C or gabled roof.
each £0.62
- F. Canadian Cone Escape**
cone shaped for use in different types of clearer boards.
each £0.62
(over 10+) each £0.52

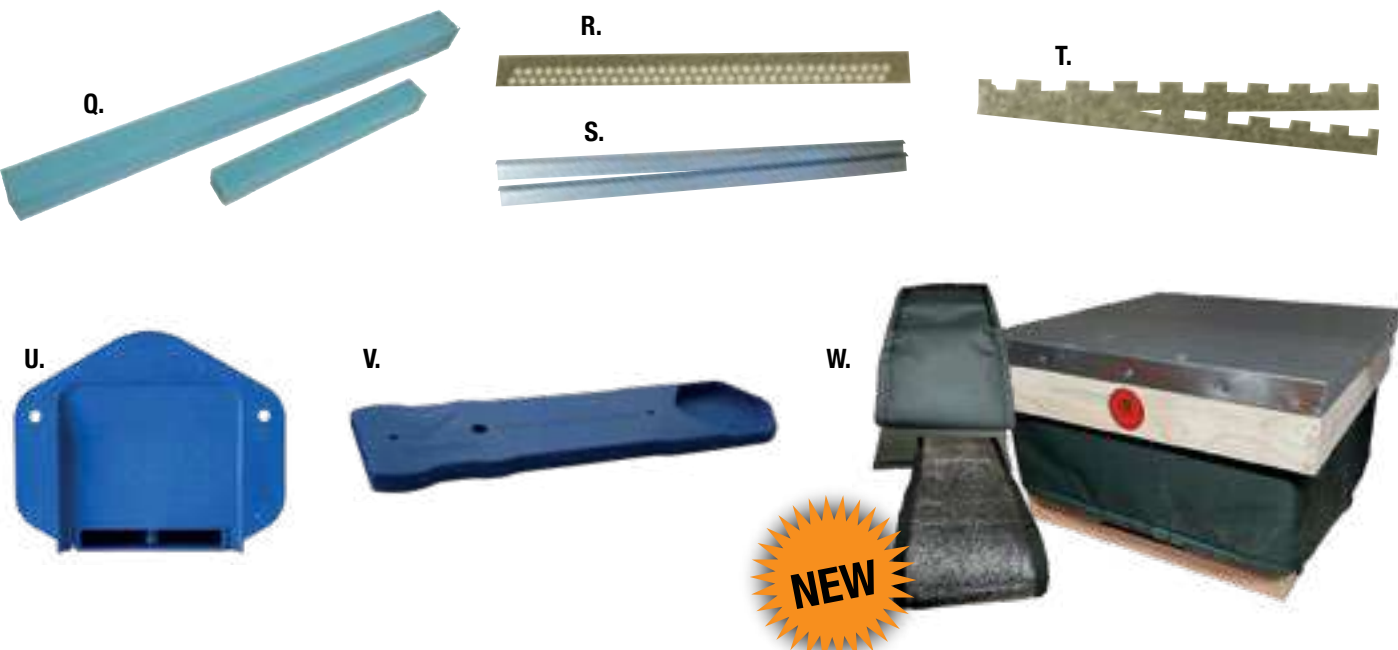

- G. Disc Entrance**
A simple plastic disc with four positions. 1.Open 2.Queen Excluder 3.Closed but with Ventilation. 4. Totally Closed. Comes in Green, Red, Yellow, Blue & White
each £0.61
(over 10+) each £0.54

- H. Mini Entrance Disc**
70mm diameter 2 settings - Open and Ventilated. Can be used with the mini nucs.
each £0.75
(over 10+) each £0.67
- I. Entrance Closure**
195mm long x 30mm wide Can be fixed to the front of most bee hives, In position A it acts as a mouse guard and the bees can enter and leave the hive. In position B it is ventilated to give air to the colony when stopped up for moving.
each £1.50
(over 10+) each £1.35
- J. Pollen Basket (National only)**
£3.28
- K. 8 Way Bee Escape**
simply put the board escape side down, under the super to be cleared
each £2.36

- L. Porter Bee Escape**
a plastic escape which has plastic springs inside which lets the bees pass through but are unable to return.
£1.25
- M. Rhombus Escape**
a simple diamond shape escape made of plastic with no moving parts.
£2.40
- N. Pollen Trap (National only)**
Pollen trap attaches to hive using the hooks supplied, the bees crawl through the plastic pollen mesh which removes pollen from their legs, this falls through a stainless steel grid into the plastic collection tray
£33.18

- O. Propolis Screen**
It is easy to gather propolis using this plastic mesh, place on top of your bee hive then add the 4 ventilation strips and put your roof back on, the bees will feel the draft from the strips being in place thus making the bees propolise the plastic screen, place screen in deep freeze for a minimum of 12 hours then take out roll up and propolis will drop off.
National, Commercial, WBC, Langstroth, M.Dadant & Smith. £2.89
- P. Brass Cone Escapes inc. Fixings - Per Pair**
suitable for WBC or Gabled Roof
£5.75

- Q. Foam Entrance Enclosures**
foam strip used to completely close the hive quickly with no ventilation, remove when hives are in position.
large - 3'1/4cm² x 45'1/2cm long £0.58
small - 2'1/2cm² x 22cm long £0.39
- R. Mouse guards**
a simple perforated metal strip which can be easily applied to the front of your bee hive.
£1.28
- S. Metal Frame Runners**
Per Pair
Available in Nat, Comm, WBC, Lang, MD & Smith
Metal £1.70
S/Steel Nat/Comm ONLY £3.52
- T. Frame Spacers**
Castellated (per pair)
Nat slot 9,10,11 £2.88
W.B.C. slot 8+10 £2.88
- U. Hive Gate Periscope**
£4.00

- V. Hive Gate**
A simple but effective way to help your bees protect themselves from wasp attack. Hive Gate is an advanced hive entrance to help protect your bees from robbing and enable improved regulation of the internal hive environment. By creating a hive entrance immediately underneath the main cluster, Hive Gate allows the colony to control entry more effectively and safeguards your bees from wasps (yellowjackets), robbing bees, the Asian hornet (Vespa velutina), wax moths and other pests and predators. Hive Gate also enables better control of temperature and relative humidity within the hive, reducing stress and workload and increasing productivity. What is Hive Gate How to use the Hive Gate advanced entrance The advantages of Hive Gate Hive Gate — proven success Where to Buy Key Facts Protects your bees from predation and robbing Does not interrupt normal behaviour of colony Reduces drifting of bees and therefore potential of disease spread Easy to use and low maintenance No mess No chemicals required Economical and long-lasting. What is HiveGate With HiveGate you can position the entrance to the colony directly beneath the winter cluster. This means that every bee in the cluster becomes a guard bee, and any intruders (if they are able to navigate their way into the colony), are quickly and easily identified and repelled. HiveGate extends the colony entrance to reach the centre of the bee cluster. This means that pests and predators cannot enter the colony undetected; the hive is significantly more defensible. The elongated entrance also means that any robbers that might enter the hive find it much more difficult to find their way out again and die in the hive, and therefore cannot return to report on the location of the colony. How to use Hive Gate to protect bees from wasps and robbers Position Hive Gate so that the internal entrance is beneath the centre of the winter cluster and fix the device in place. Close up the hive entrance so that the only opening is the external Hive Gate entrance (an optional Adapter Plate is available to do this). When the colony is strong, additional Hive Gate device(s) can be added to expand the entry space, or the hive entrance can be opened up, as the colony is strong enough to defend itself without assistance. Periodically clean as you usually would with hive components.
£10.99

- W. Hive Wrap**
the wrap is designed to keep the temperature inside the hives and protect the beehives from environmental effects. During the autumn and winter period it provides keeping the warm inside the hives, protects from the rain snow, and wind. During the spring and summer period, it protects from the rain and hot weather, direct sunlight. Altogether it helps the bees to keep the comfortable climate inside the hives. Technical properties: It consists of three layers: 1) Metal foil. It reflects thermal radiation. 2) The foam structure of closed air-filled cells prevents the movement of heated air, that is, convection, which allows heat to be retained. For comparison, the thermal conductivity coefficient of foamed polyethylene is 0.038 W / (m · K), and the thermal conductivity of red cedar is 0.095 W / (m · K). That is, the thermal conductivity coefficient of foamed polyethylene is approximately three times less than the thermal conductivity coefficient of red cedar. The lower the coefficient of thermal conductivity of the material, the more heat it retains. The thickness of the foamed polyethylene layer in the wrap is 8 mm. That is, in the context of thermal conductivity, this is equivalent to a 25 mm board of red cedar. 3. The upper layer of the wrap. The upper layer of the wrap is made of dense synthetic material (polyester or nylon) with a special coating. This material has the following properties: — waterproof and water-repellent properties; — wear resistance — dirt resistance — heat resistance — high strength — increased resistance to abrasion of threads Also, it should be applied as follows: — Put the wrap on the brood box and stretch the wrap over the brood box well. — Put the beehive roof on the top — insert the top edge of the wrap between the roof and brood box.
£27.00

**A. Metal Roof Covers**

available in all sizes and made of galvanised steel.

Nat, Comm & Nucleus	£12.93
W.B.C. & Gabled (per Pair)	£17.48
Lang, Smith & MD	£12.93

B. Hamilton Converter

This will turn a National brood chamber in to a 10 frame Commercial made from western red cedar.

Cedar Flat	£10.94
Cedar Assembled	£16.32

C. Travelling Box – BS Only

a simple plywood box with plenty of ventilation used for taking swarms or making up nucleuses on site.

£39.58

D. Translucent Tube

to be used with our observation case, the internal bore is 19mm and is suitable for fixing to the plastic pipe of the Observation hive and allows flexibility when positioning the unit.

E. Observation Hive

comes complete with ¼ gallon contact feeder & shutters, will hold 1 brood frame & 2 super frames (frames and feeder not included) has a central pivot point in place for turning the observation case & an external entrance & comes complete with two double glazed units. This item is made of mahogany

£261.25

F. Soda Crystals

Ideal for removing propolis and wax from hive tools, smokers, gloves, bee suits, especially poly hives... Totally bio-degradable and comes in 1kg bag.

1kg Bag	£1.50
10kg Bag	£12.50

G. Hoffman Converter Clips

a simple plastic clip which clips to the top of a DN1 and SN1 side bar to give the perfect Hoffman spacing.

Bag of 50	£5.25
Bag of 100	£10.26

**H. National Six Comb Nucleus Standard**

western red cedar with a galvanised metal roof cover, with space within the roof to accommodate ½ gallon contact feeder. Comes with solid floor, brood chamber, crown board and roof.

Cedar flat	£152.18
Cedar assembled	£187.99
14 x 12 Cedar flat	£182.92
14 x 12 Cedar assembled	£231.86

I. Traditional English Skep

a straw bowl which is used for collecting swarms.

£87.77

J. Skep with Entrance

a straw bowl which is used for collecting swarms.

£40.43

K. Double Hive Stand (Assembled Only)

is made of treated timber, can accommodate two hives and has collapsible legs.

£97.80

L. National Wooden Six Comb Nucleus Stand

Designed only for the wooden 6 frame nuc.

Cedar flat	£29.56
Cedar assembled	£38.02

M. Narrow Ends, Plastic

green, red, yellow, blue & white, with spacing of 1 7/16".

10	£1.22
50	£5.65
100	£10.21

N. Wide Ends, Plastic

white only with spacing of 1 7/8".

10	£1.31
50	£6.20
100	£11.11

O. Professional Hive Lifter Awd – Electric

Professional Hive Lift with chain feed – Can easily lift up to 100 kg. Self Lifting function – so no problem getting it in the car. Can be used for both polystyrene hive and wooden hives. Drives on both wheels with differential. Maximum lifting height: 107 cm Lifting weight: 100 kg Height: 167 cm Weight 52,5 kg Driving speed: 6,5 km/h Maximum payload: 100 kg Battery working hours: 4, Charging hours for battery: 6.

£3280.68

P. Professional Hive Lifter – Manual

Can easily lift 100kg. Two strong rubber coated grips are clamped against the beehive with a single grip for lifting. A winch is used to lift the supers up. Now with chain drive manually operated, This model can be used for both polystyrene hives and wooden hives. The clamps can accommodate almost any size of beehive up to 70cm wide. The lift comes with two forks so you can use it as a mini fork lift. Maximum lifting height: 98cm Maximum payload: 100kg Size: 150x43x48cm Weight: 28kg

£1109.37

Parts & Accessories inc. VAT

A. Wire for Frames

frame wire supplied on a plastic bobbin for customers who prefer to wire their own foundation (galvanised).

250g £4.60

B. Wire Crimper

crimping device to make wiring frames easier

£10.41

C. Frame Nails

3/4" length, black japanned gimp pins for assembling frames & other jobs in the apiary.

100g £2.56

500g £9.32

D. Maisemore 500g Box Of Frame Nails

available 3/4" in length, black japanned gimp pins used for assembling frames and other jobs in the apiary, 500g will do approx 350 frames.

500g £4.75

E. Nails for Hives

Lost head 1" & 1 1/2"

- 500g

£7.96

Headed 1 1/2" & 2"

- 500g

£7.96

F. Eyelets

these are small brass rings which are punched into the side bar of the frame, this stops the wire cutting into the wood.

Approx 1000 per pack

£19.64

G. Eyelet Punch

Place eyelet onto machine, place your frame in the channel provided and push handle down, the eyelet will be imbedded into the frame with a hole for the wire to go through.

£16.75

H. Wood Protective Treatment (Clear)

Barrettine Wood Protective Treatment gives an excellent level of protection against fungal decay by repelling potential water ingress into the wood which can lead to fungal spores growing and then advance to fungal decay. The oil/spirit based formulation penetrates deep into the wood fibres and structure. The rich blend of natural oils, wax and resins nourishes and protects the timber from water ingress, UV damage and wood splitting caused by direct sunlight. Once dry, the product poses no risk to beneficial insects such as bees, plants of animals, hence the bee friendly symbol on the tin. Repeat application/ treatment will protect your wood keeping it beautiful for years to come. The time between subsequent applications will depend on the location, elevation and exposure to weathering.

1 LITRE £9.99

2 1/2 LITRE £17.50

5 LITRE £23.50

Parts & Accessories inc. VAT

I. Rampin

simple magnetic device, drop a frame nail into the end and push down onto the frame, no more bruised fingers.

£9.82

J. Spur Embedder

A must when wiring your own frames with foundation.

£6.20

K. Transformer (24v)

this transformer can be used for running your own wiring board or for embedding wax into pre-wired frames.

£45.03

L. Brummer stopping exterior wood filler 225grms

An ideal product for stopping up woodpecker holes and splits in your hive.

Light Mahogany £7.75

NEW Dark Mahogany £7.75

M. Weatherproof Wood Adhesive

High strength creating a bond that is usually stronger than wood itself.

125ml £2.57

N. Clear Cuprinol

the only clear insecticide free product in their range. Protection for wood against all types of rot, decay & woodworm. Apply to external surfaces of your hive ONLY. 1 litre covers 8m² (2 coats) approx 5 hives.

1 litre £16.40

5 litre £55.90

O. Berling Bee Hive Paint

High Quality water based acrylic enamel, based on self-cross linking resins with excellent performance and great resistance. Tested and verified by the Agriculture Department of Agricultural University of Athens (Greece) considered as an ideal material for the painting and maintaining of wooden bee hives used in beekeeping.

Available in 4 colours - WHITE, GREEN, BLUE, YELLOW

0.75L £23.46

P. Exterior Wood Oil

Rustins Exterior Wood Oil is a unique water-borne blend of natural plant oils and other special ingredients to nourish and protect all types of outdoor timber which dries with a low lustre finish. Use for all exterior joinery & woodwork. It is a penetrating oil drying to a hard durable and water resistant seal that brings out the beauty of the grain within the timber. Rustins Exterior Wood Oil confirms to The Articles in Contract with Food Regulations. Clean brushes with water. Water based & quick drying For exterior use on all woods Low odour Food safe Gives high UV protection Easy wipe-on natural finish

N. GRANULATED HONEY

All pure honey will granulate or become solid in cool weather, and this condition is, in fact, the best proof of its quality. It can be easily restored to the liquid state by standing the jar in hot water, first loosening the cap. The heating of the water should continue until the honey becomes liquid. The jar should stand on strips of wood so that there is water below as well as around the jar. To microwave, remove lid and select low power and stir occasionally until clear.

N. WHITE option 1 - without bottom line
option 2 - with bottom line

Distinctive Labels inc. VAT

DISTINCTIVE LABEL (YOUR OWN DESIGN) "as individual as you are"
Design your own label with your own image and your own text, once you are happy with your design place your order and that's it you're finished, that simple!
If you don't have a picture or would like to choose one of our designs instead then we have 8 labels for you to choose from (see below). You can order them in the form of rectangle, square and oval, in all of the sizes mentioned below.

UK HONEY LABELLING REGULATIONS
This is our advice on honey labelling, if you require more detailed information please go the Food Standards Agency.

- The word HONEY is required.
- The weight must be on the label.
- You can specify the area/county where the honey is produced, for example Gloucestershire Honey, Worcestershire Honey and Herefordshire Honey.
- You can specify if you want the type of honey. For example, Flower, Borage or Heather, the Honey must be at least 75% of that particular type.
- If you are selling honey you must have your name and address details on the label. It does not need to be complete but you must be able to be found from the information given.
- If you are selling the honey through a third party you must have a lot number/batch number.
- You must have a best before end date on the jar, we recommend 2-5 years from current date
- You must have a country of origin on the jar, for example, Produce of UK, Product of Scotland or Harvested in Wales. ADDING THE COUNTRY TO THE END OF YOUR ADDRESS IS NOT ACCEPTABLE.

If you require lot number from L001 to L100 on each label then please specify on the special comments and delivery instruction box which is found on inputting your personal details when completing an order.

Maisemore Apiaries Ltd

Professional beekeepers, manufacturers and retailers est.1953

MAISEMORE APIARIES LTD Old Road, Maisemore, Gloucester GL2 8HT

Directions

When you get to the village of Maisemore go past the public house called The White Hart Inn on your right, approx 300 yards on the right is a nursing home, turn into Church Road. When you get to the Church bear left and follow the road until you meet the cross roads, go straight over. You will climb uphill for approx 3/4 mile. When you drop down into the bottom you will find Maisemore Apiaries car park on the left and the shop on your right.
